Overman, 2008-11-30 Despite some enormous differences in salary among professional athletes most aspects of their daily lives remain surprisingly constant across sports and income levels In *Living out of Bounds* author Steven J Overman mines a wide array of sports biographies autobiographies memoirs and diaries to construct a representative picture of the athlete's life In the course of the work a portrait emerges that transcends the individual lives lived The shared experiences of devoted training of travel and hotels and of tension within and beyond the clubhouse or gym force us to appreciate the often oppressive reality of the sporting life at the same time that the individual lives lived also provide us with a glimpse of the rewards that make sports so compelling to audiences and athletes across America

*Celebrity in the Time of Covid* Christina S. Beck, 2022-08-04 This work describes the crucial role celebrities played in the emergence of two competing narratives about Covid 19 one a pro science narrative that advocated for preventive measures and the other a skeptical counter narrative that denied the disease s existence or downplayed its severity During the first postmodern pandemic a slew of interactions took place across a variety of platforms between prominent figures and those who connected with them forming parasocial communities that framed perspectives on Covid 19 The author first describes how Covid 19 unfolded in the world of sports then goes on to explain how supportive behavior toward public officials fueled the two competing narratives emphasizing how celebrities themselves aided in the development of common perspectives The

text concludes with a description of how citizens initially regarded health care professionals as heroes but even the most powerful public appeals could not persuade some that Covid 19 posed a genuine threat Exploring the polarity of publicly held beliefs this book documents how celebrity advocacy had a lasting effect on people s health choices during a global pandemic
