**Handbook of Industry 4.0 and SMART Systems** Diego Galar Pascual, Pasquale Daponte, Uday Kumar, 2019-09-17  
Industry 4.0 refers to fourth generation of industrial activity characterized by smart systems and internet based solutions. This book describes the fourth revolution based on instrumented interconnected and intelligent assets. The different book chapters provide a perspective on technologies and methodologies developed and deployed leading to this concept. With an aim to increase performance, productivity and flexibility, major application areas of maintenance through smart systems have been discussed in detail. Applicability of 4.0 in transportation, energy and infrastructure is explored with effects on technology, organisation and operations from a systems perspective. *Internet of Things and the Law* Guido Noto La Diega, 2022-10-14  
Internet of Things and the Law: Legal Strategies for Consumer Centric Smart Technologies is the most comprehensive and up to date analysis of the legal issues in the Internet of Things (IoT). For decades, the decreasing importance of tangible wealth and power and the increasing significance of their disembodied counterparts has been the subject of much legal research. For some time now, legal scholars have grappled with how laws drafted for tangible property and predigital offline technologies can cope with dematerialisation, digitalisation and the internet. As dematerialisation continues, this book aims to illuminate the opposite movement, rematerialisation, namely the return of data, knowledge and power within a physical smart world. This development frames the book's central question: can the law steer rematerialisation in a human centric and socially just direction? To answer it, the book focuses on the IoT, the sociotechnological phenomenon that is primarily responsible for this shift. After a thorough analysis of how existing laws can be interpreted to empower IoT end users, Noto La Diega leaves us with the fundamental question of what happens when the law fails us and concludes with a call for collective resistance against smart capitalism. **Digital Disciplines** Joe Weinman, 2015-08-17  
Leverage digital technologies to achieve competitive advantage through market leading processes, products and services, customer relationships and innovation. How does Information Technology enable competitive advantage? Digital Disciplines details four strategies that exploit today's digital technologies to create unparalleled customer value. Using non-technical language, this book describes the blueprints that any company, large or small, can use to gain or retain market leadership based on insights derived from examining modern digital giants such as Amazon, Netflix and Uber, established firms such as Burberry, GE, Nike and Procter & Gamble, and lesser known innovators such as Alvia, Fruition Sciences, Opower and Quirky. Companies can develop a competitive edge through four digital disciplines: information excellence, solution leadership, collective intimacy and accelerated innovation that exploit cloud computing, big data and analytics, mobile and wireline networks, social media and the Internet of Things. These four disciplines extend and update the value disciplines of operational excellence, product leadership and customer intimacy originally defined by Michael Treacy and Fred Wiersema in

their bestselling business classic *The Discipline of Market Leaders* Operational excellence must now be complemented by information excellence leveraging automation information analytics and sophisticated algorithms to make processes faster better and more cost effective seamlessly fuse digital and physical worlds and generate new revenue through techniques such as exhaust data monetization Product leadership must be extended to solution leadership smart digital products and services ranging from wind turbines and wearables to connected healthcare linked to each other cloud services social networks and partner ecosystems focused on customer outcomes and creating experiences and transformations Customer intimacy is evolving to collective intimacy as face to face relationships not only go online but are collectively analyzed to provide individually targeted recommendations and personalized services ranging from books and movies to patient specific therapies Traditional innovation is no longer enough accelerated innovation goes beyond open innovation to exploit crowdsourcing idea markets innovation networks challenges and contest economics to dramatically improve processes products and relationships This book provides a strategy framework empirical data case studies deep insights and pragmatic steps for any enterprise to follow and attain market leadership in today s digital era It addresses improved execution through techniques such as gamification and pitfalls to beware including cybersecurity privacy and unintended consequences Digital Disciplines can be exploited by existing firms or start ups to disrupt established ways of doing business through innovative digitally enabled value propositions to win in competitive markets in today s digital era     Kiplinger's Personal Finance ,1988-01 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics     Innovation and Entrepreneurship Charles H. Matthews,Ralph Brueggemann,2015-03-12 This book presents a new model the competency framework for students innovators entrepreneurs managers and anyone who wants to better understand the dynamic world of innovation and entrepreneurship Focused on both the individual and strategic organizational level this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future Matthews and Brueggemann s framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation It provides a practical guide and clear and concise understanding of the knowledge skills attitudes and experiences that are needed to increase imagination creativity innovation and new venture creation capability Innovation and Entrepreneurship will be attractive for students of entrepreneurship innovation management and cross disciplinary classes such as design thinking Presented in a modular format Innovation Entrepreneurship informs the future direction of people and technology as well as the educational systems producing the next generation of innovators and entrepreneurs Based on extensive academic research this book is organized into two sections Twelve innovation elements and twelve competency categories The elements are the foundation and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives     *The Age of*
