Video Art Ira Schneider,Beryl Korot,1976 Ira Schneider and Beryl Korot pioneers in the field have put together *Video Art* to demonstrate to a wide range of readers the scope and possibilities of this exciting new art form Seventy three artists have contributed two page spreads expressing evoking or explaining some aspect of their work many with photographs from their tapes twenty two critics and video participants have written articles reviewing some of the major tapes facilities and installations discussing video s history and speculating on its role as an instrument of change in society as a whole as well as

in the art world With more than five hundred photographs and drawings Ira Schneider and Beryl Korot have had their video tapes and installations exhibited at museums galleries theaters universities and art schools in the United States and elsewhere The authors cofounded the magazine **Radical Software** **Human Behavior and Environment** Irwin Altman,Joachim F. Wohlwill,1977-11-01 The papers comprising this second volume of Human Behavior and the Environment represent as do their predecessors a cross section of current work in the broad area of problems dealing with interrelationships between the physical environment and human behavior at both the individual and the aggregate levels Considering the two volumes as a unit we have included papers covering a broad spectrum of problems ranging from the theoretical to the applied and from the disciplinary based to the interdisciplinary and professional Approximately half of the papers are written by psychologists with the remainder coming in part from such other disciplines as sociology geography and from such diverse applied and professional fields as natural recreation landscape architecture urban planning and operations research The volumes thus provide an overview of work on current topical problems Yet as the field is developing specialization is inevitably increasing apace and the editors as well as the publisher have become convinced of the desirability for future volumes in this series to be organized along topical lines with successive volumes devoted to different aspects of this rather sprawling field Thus Volume 3 currently in the planning stage will be devoted exclusively to the interaction of children with the physical environment considered from diverse viewpoints again including authors from diverse fields of specialization
