

The background of the book cover is a landscape painting. The upper half features a sky with a gradient of orange and red, suggesting a sunset or sunrise. Below the sky is a dark, silhouetted horizon line. The lower half of the image is a green field, possibly a lawn or a field of grass, which is slightly out of focus.

Selected Readings For Introduction To International Terrorism:

Political Terrorism A.J. Jongman, 2017-07-28 While there is no easy way to define terrorism it may generally be viewed as a method of violence in which civilians are targeted with the objective of forcing a perceived enemy into submission by creating fear demoralization and political friction in the population under attack At one time a marginal field of study in the social sciences terrorism is now very much in center stage The 1970s terrorist attacks by the PLO the Provisional Irish Republican Army the Popular Front for the Liberation of Palestine the Japanese Red Army the Unabomber Aum Shinrikyo Timothy McVeigh the World Trade Center attacks the assault on a school in Russia and suicide bombers have all made the term terrorism an all too common part of our vocabulary This edition of Political Terrorism was originally published in the 1980s well before some of the horrific events noted above This monumental collection of definitions conceptual frameworks paradigmatic formulations and bibliographic sources is being reissued in paperback now as a resource for the expanding community of researchers on the subject of terrorism This is a carefully constructed guide to one of the most urgent issues of the world today When the first edition was originally published Choice noted This extremely useful reference tool should be part of any serious social science collection Chronicles of Culture called it a tremendously comprehensive book about a subject that any who have anything to lose from property to liberty life to limbs should be forewarned against *Terror on the Internet* Gabriel Weimann, 2006 Drawing on a seven year study of the World Wide Web and a wide variety of literature the author examines how modern terrorist organizations exploit the Internet to raise funds recruit and propagandize as well as to plan and launch attacks and to publicize their chilling results *Negotiating with Terrorists* Guy Olivier Faure, I. William Zartman, 2010-02-25 This edited volume addresses the important issue of negotiating with terrorists and offers recommendations for best practice and processes Hostage negotiation is the process of trying to align two often completely polarised parties Authorities view hostage taking as unacceptable demands made by unacceptable means However terrorists view their actions as completely justified even on moral and religious grounds If they are to try and reconcile these two sides it is essential for hostage negotiators to understand terrorist culture the hostage takers profiles their personality their view of the world and also the authorities their values and their framing of the problem raised by the taking of hostages Although not advocating negotiating with terrorists the volume seeks to analyse when why and how it is done Part I deals with the theory and quantifiable data produced from analysis of hostage situations while Part II explores several high profile case studies and the lessons that can be learnt from them This volume will be of great interest to students of terrorism studies conflict management negotiation security studies and IR in general I William Zartman is the Jacob Blaustein Distinguished Professor Emeritus of International Organization and Conflict Resolution and former Director of the Conflict Management and African Studies Programs at the Paul H Nitze School of Advanced International Studies Johns Hopkins University Washington DC He is a member of the Steering Committee of the Processes of International Negotiation PIN Program at the

International Institute of Applied Systems Analysis IIASA in Laxenburg Austria He is author editor of over 20 books on negotiation conflict and mediation Guy Olivier Faure is Professor of Sociology at the Sorbonne University Paris I and a member of the Steering Committee of the Processes of International Negotiation PIN Program at the International Institute of Applied Systems Analysis IIASA in Laxenburg Austria He has served as an advisor to French government on hostage negotiations

Contradictions of Terrorism Sandra Walklate, Gabe Mythen, 2014-09-15 Over the last fifteen years there has been a significant growth in literature dealing with terrorism Nevertheless scholars within mainstream criminology have only recently begun to grapple with the problem of terrorism in a sustained fashion In this provocative book the authors provide both an exposition of the contradictions that have emerged around the regulation of terrorism and an incisive analysis of the questions that the management of terrorism poses for the discipline Focusing primarily on the processes and practices that have emerged in the United States and the United Kingdom the book provides a critical account of the political construction mediation and regulation of terrorist threat since the events of 9 11 The authors explore the ways in which new institutional modes of risk assessment based on the principle of pre-emption have impacted on individuals targeted by them Noting the dilemmas produced by the pre-emptive turn the authors also elucidate more recent moves to develop the idea of resilience in counter terrorism and security policy This book will be suitable for academics and students interested in political violence terrorism geopolitics and risk as well as for practitioners and experts working in the security industries

A Political Organization Approach to Transnational Terrorism Kent Layne Oots, 1986-03-19 **SNI Documents** National Criminal Justice Reference Service (U.S.), 1978 Introduction to Criminology Frank E. Hagan, 2015-12-09 Written

by active researcher and bestselling author Frank E Hagan Introduction to Criminology Ninth Edition is a comprehensive introduction to the study of criminology focusing on the vital core of criminological theory theory method and criminal behavior With more attention to crime typologies than most introductory texts Hagan investigates all forms of criminal activity such as organized crime white collar crime political crime and environmental crime The methods of operation the effects on society and policy decisions and the connection between theory and criminal behavior are all explained in a clear accessible manner All statistics tables and figures have been updated as have the photographs supplements and audio and video packages in the new edition to make the material most relevant for your course

The Success of Political Terrorist Events Idris Sharif, 1996 Most researchers have tended to treat terrorist behavior within pathological and criminal frameworks and have considered it illegitimate politically meaningless and unsuccessful behavior This research takes a different view of political terrorist behavior by arguing that it is logical and rational and that these terrorist activities are actually a form of politically motivated behavior The study examines the extent to which terrorist tactics and victim characteristics affect the success of political terrorist events The research in this work uses data from International Terrorism Attributes of Terrorist Events 1967 1977 including a three point scale named Success of political terrorism and

seven predictor variables The findings confirm that the existence of political terrorist events are more likely than not to end in success These findings support several hypotheses including the conclusion that geographical location has a significant effect on political terrorism and that explosives rather than small arms have an effect on success The information in this book will appeal to diplomatic missions international development agencies and multinational corporations In addition university and departmental libraries as well as students of politics collective behavior social movements conflict resolution and peace studies will all benefit from reading this book

Digital Privacy, Terrorism and Law Enforcement Simon Hale-Ross, 2018-07-06 This book examines the UK's response to terrorist communication Its principle question asks has individual privacy and collective security been successfully managed and balanced The author begins by assessing several technologically based problems facing British law enforcement agencies including use of the Internet the existence of darknet untraceable Internet telephone calls and messages smart encrypted device direct messaging applications and commercially available encryption software These problems are then related to the traceability and typecasting of potential terrorists showing that law enforcement agencies are searching for needles in the ever expanding haystacks To this end the book examines the bulk powers of digital surveillance introduced by the Investigatory Powers Act 2016 The book then moves on to assess whether these new powers and the new legislative safeguards introduced are compatible with international human rights standards The author creates a digital rights criterion from which to challenge the bulk surveillance powers against human rights norms Lord Carlile of Berriew CBE QC in recommending this book notes this particular legal advancement commenting that rightly so the author concludes the UK has fairly balanced individual privacy with collective security The book further analyses the potential impact on intelligence exchange between the EU and the UK following Brexit Using the US as a case study the book shows that UK laws must remain within the ambit of EU law and the Court of Justice of the European Union's CJEU's jurisprudence to maintain the effectiveness of the exchange It addresses the topics with regard to terrorism and counterterrorism methods and will be of interest to researchers academics professionals and students researching counterterrorism and digital electronic communications international human rights data protection and international intelligence exchange
