Self-knowledge and social relations John King-Farlow, 1978 Self Consciousness Anthony Cohen, 2002-09-11 Traditionally the self and the individual have been treated as micro versions of larger social entities by the social sciences in general and by anthropology in particular In *Self Consciousness* Cohen examines this treatment of the self arguing that this practice has resulted in the misunderstanding of social aggregates precisely because the individual has been ignored as a constituent element By acknowledging the individual's self awareness as author of their own social conduct and of the social forms in which they participate this informs social and cultural processes rather than the individual being passively modelled by them **The Feminist Standpoint Revisited, And Other Essays** Nancy C.M. Hartsock, 2019-07-16 In this book Nancy C M Hartsock offers her current thinking about the development of feminist political economy focusing on the relationships between feminist theory and activism feminism and Marxism and postmodernism and feminist politics Psychiatric-mental Health Nursing Sheila L. Videbeck, 2010-02 This fully updated Fifth Edition explores the full psychiatric nursing curriculum from theoretical foundations to application of interventions for commonly encountered disorders The focus is on treatment modalities nursing care therapeutic communication and self awareness The built in study guide helps reinforce student learning and knowledge retention Abundant features highlight the most pertinent learning concepts *Humboldt Journal of Social Relations*, 1979 The Routledge Handbook of Animal Ethics Bob Fischer, 2019-12-06 There isn't one conversation about animal ethics Instead there are several important ones that are scattered across many disciplines This volume both

surveys the field of animal ethics and draws professional philosophers graduate students and undergraduates more deeply into the discussions that are happening outside of philosophy departments To that end the volume contains more nonphilosophers than philosophers explicitly inviting scholars from other fields such as animal science ecology economics psychology law environmental science and applied biology among others to bring their own disciplinary resources to bear on matters that affect animals The Routledge Handbook of Animal Ethics is composed of 44 chapters all appearing in print here for the first time and organized into the following six sections I Thinking About Animals II Animal Agriculture and Hunting III Animal Research and Genetic Engineering IV Companion Animals V Wild Animals Conservation Management and Ethics VI Animal Activism The chapters are brief and they have been written in a way that is accessible to serious undergraduate students regardless of their field of study The volume covers everything from animal cognition to the state of current fisheries from genetic modification to intersection animal activism It is a resource designed for anyone interested in the moral issues that emerge from human interactions with animals

Mysticism, Ineffability and Silence in Philosophy of Religion Laura E. Weed, 2023-01-13 The authors in this volume explore a wide variety of the contemporary approaches to mystical and religious experience to elucidate what religious experience is in its own terms and how its practitioners understand it This anthology features contributions that point out that contemporary studies of consciousness sociology hermeneutics neuroscience medicine and other fields are revealing that there is much more to be said for the inner life of a human s consciousness than reductionists and behaviorists will allow This book is one of very few that primarily takes the stance of academic practitioners explaining their own experience rather than that of academics trying to explain the phenomena away as really politics or sociology or delusion or psychological pathology or literary flights of fancy or an aberration of any of the other academic fields Most of the authors in this volume embrace the task of explaining and analyzing religious experience mysticism and the healing power of silence and presence using the resources of all of the academic disciplines as appropriate The essays contained analyze religious and non religious mystical and profoundly personal experiences across several world religions and in areas such as art and music as well as in solving personal crises such as family disruption and patriarchal oppression The authors address the subject matter through analyses of the frequent and destructive failures of language or just noise to capture or express the nuances of the inner life of a person It is this very ineffability of self that renders the spiritual emotional and interior life of individuals beyond cognition and perception of the straightforward sorts embraced by most cognitive disciplines The contributors come from a variety of cross disciplinary fields to bring forth the possibilities for an intuitive and creative rich and growing inner life for a human This text appeals to students researchers and practitioners

Proto-Phenomenology, Language Acquisition, Orality and Literacy Lawrence J. Hatab, 2019-10-25 Through his innovative study of language noted Heidegger scholar Lawrence Hatab offers a proto phenomenological account of the lived world the first world of factual life where pre reflective immediate

disclosiveness precedes and makes possible representational models of language. Common distinctions between mind and world, fact and value, cognition and affect, miss the meaning-laden dimension of embodied practical existence where language and life are a matter of dwelling in speech. In this second volume, Hatab supplements and fortifies his initial analysis by offering a detailed treatment of child development and language acquisition which exhibit a proto-phenomenological world in the making. He then takes up an in-depth study of the differences between oral and written language, particularly in the ancient Greek world, and how the history of alphabetic literacy shows why Western philosophy came to emphasize objective representational models of cognition and language which conceal and pass over the presentational domain of dwelling in speech. Such a study offers significant new angles on the nature of philosophy and language.

Radical Critiques of the Law Stephen M. Griffin, Robert C. L. Moffat, 1997. The past two decades have seen an outpouring of work in legal theory that is self-consciously critical of aspects of American law and the institutions of the liberal state. In this lively volume, eminent scholars in philosophy, law, and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law, examining such theories as critical legal studies, feminist theory, and theories of difference and critical race theory. The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should take. Writing at the cutting edge of the critique of critical legal theory, they offer insights first on critical legal scholarship, then on feminist political and legal theory. A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism, while a final section focuses on current issues of legal reform through critical views on criminal punishment, including observations on rape and hate speech. Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it, while accompanying commentaries present conflicting views. The resulting dialogue explores wide-ranging issues like equity, value, relativism, adversarial and empathic legal advocacy, communitarianism, and the social contract, impartiality and contingency, natural law and corrective justice. A common thread for many of the articles is a focus on the social dimension of society and law, which finds the individualism of prevailing liberal theories too limiting. **Radical Critiques of the Law** is particularly unique in presenting critical and feminist approaches in one volume, along with skeptical commentary about just how radical some critiques really are. Proposing alternative critiques that embody considerably greater promise of being truly radical, it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best.

Rousseau and Education According to Nature Thomas Davidson, 1898. **Sartre and Psychoanalysis** Betty Cannon, 1991. Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition. Drawing upon Sartre's work as well as her own experiences as a practicing therapist, she shows that Sartre was a fellow traveler who appreciated Freud's psychoanalytic achievements but rebelled against the determinism of his metatheory. The mind, Sartre argued, cannot be

reduced to a collection of drives and structures nor is it enslaved to its past as Freud's work suggested Sartre advocated an existentialist psychoanalysis based on human freedom and the self's ability to reshape its own meaning and value. Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs. By comparing Sartre with Freud and influential post-Freudians like Melanie Klein, Otto Kernberg, Margaret Mahler, D. W. Winnicott, Heinz Kohut, Harry Stack Sullivan, and Jacques Lacan, she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory. In the process, she adds a new dimension to our understanding of Sartre and his place in twentieth-century philosophy. The Phrenological Journal and Science of Health, 1889
