**University Rankings, Diversity, and the New Landscape of Higher Education** ,2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector **American Journal of Education and College Review** ,1871 Vol 25 is the report of the commissioner of education for 1880 v 29 report for 1877

Global University Rankings and the Politics of Knowledge Michelle Stack,2021-06-17 For many institutions to ignore your university's ranking is to become invisible a risky proposition in a competitive search for funding But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university Drawing on a range of research and inquiry based methods Global University Rankings and the Politics of Knowledge exposes how universities became servants to the education industry and its impact Conceptually unique in its scope Global University Rankings and the Politics of Knowledge addresses the lack of empirical research behind university and journal ranking systems Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media driven rankings This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice *Post-tenure Review* Association of Research Libraries. Rank Hypocrisies Derek Sayer, 2014-12-03 In crystalline text steeped in cold rage Sayer takes aim at the REF's central claim that it is a legitimate process of expert peer review He critiques university and national level REF processes against actual practices of scholarly review as found in academic journals university presses and North American tenure procedures His analysis is damning If the REF fails as scholarly review how can academics and universities continue to participate And how can government use its rankings as a basis for public policy Tarak Barkawi London School of Economics Sayer makes a compelling argument that the Research Excellence Framework is not only expensive and divisive but is also deeply flawed as an evaluation exercise Rank Hypocrisies is a rigorous and scholarly evaluation of the REF yet written in a lively and engaging style that makes it highly readable Dorothy Bishop University of Oxford Few decisions are as consequential for the funding and reputation of Britain's universities as those of REF panels Not only do REF rankings determine the levels of research funding universities receive from the state They equally affect institutions ability to attract external grants top flight faculty and graduate students Whatever benefit the UK's periodic research assessment exercises may have brought to research productivity the REF has been widely criticized for its enormous costs in taxpayers money and academics time its discouragement of innovative and especially interdisciplinary research and its negative effects on collegiality and staff morale Derek Sayer extends these arguments notably through his discussion of the questionable staff selection processes used in REF2014 within his own university Where Rank Hypocrisies goes beyond previous critiques is in its open challenge to the REF's claim to provide expert review of the outputs the very heart of its legitimacy Examining the composition and operation of REF disciplinary subpanels in forensic detail Sayer paints a picture in which overburdened assessors assign vaguely defined grades in fields that are frequently not their own while ignoring all external indicators of the academic influence of the publications they are appraising and then shred all records of their deliberations Judged against international norms of peer review the REF is an elaborate charade and an insult to the core values of the academy The Saturday Review of Politics, Literature, Science and Art, 1872 **Independent Review of Police Officer and Staff**
