Spotify In The Us Setup:

Popular Music in a Digital Music Economy Tim Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments

Reinventing Capitalism in the Age of Big Data Viktor Mayer-Schonberger, Thomas H. Davenport, 2018-02-22 Markets have long been acknowledged to be a superior mechanism for managing resources but until the advent of big data they largely functioned better in theory than in practice Now as ideal markets are within reach because of vastly greater access to information we are on the verge of a major disruption As data becomes a more valuable asset than cash the rules for surviving and thriving are changing Reinventing Capitalism is a provocative look at how data is reinventing markets and in so doing is ushering in an era where the firm is no longer predominant With richer and more comprehensive information about human wants and needs an economy powered by data offers the possibility of increased abundance equality and resilience The data driven markets that will thrive in this environment are far better than firms at organizing human endeavors meaning that finance driven capitalism is being displaced by its more efficient more sustainable and more democratic disruptor data capitalism
