Perrig,Alexander Grob,2013-05-13 In this book an international group of leading scientists present perspectives on the control of human behavior awareness consciousness and the meaning and function of perceived control or self efficacy in people s lives The book breaks down the barriers between subdisciplines and thus constitutes an occasion to reflect on various facets of control in human life Each expert reviews his or her field through the lens of perceived control and shows how these insights can be applied in practice      **Understanding Depression** Janet Stoppard,2014-01-14 Women are particularly vulnerable to depression Understanding Depression provides an in depth critical examination of mainstream approaches to understanding and treating depression from a feminist perspective Janet Stoppard argues that current approaches give only partial accounts of womens experiences of depression and concludes that a better understanding will only be achieved when womens experiences and lived realities are considered in relation to the material and social conditions in which their everyday lives are embedded The impact of this change in approach for modes of treatment are discussed and solutions are suggested Understanding Depression offers new insights into the problem and its treatment It will prove useful to those with an interest in depression and gender as well as mental health practitioners      *Current Controversies and Issues in Personality* Lawrence A. Disorders of the Self Marshall L. Silverstein, 2007

In this thought provoking book Marshall L. Silverstein applies a self psychological viewpoint as formulated and broadened by Kohut to understanding personality disorders. He recasts them as disorders of the self, grouping them into one of three patterns: centering on a combating devitalization, b forestalling fragmentation, or c seeking alternative pathways to a cohesive self. He describes each group, outlines its main theoretical viewpoints, and then offers a self psychological reformulation of how the behavior and symptom patterns represent deficits in self cohesion. In the first deficit pattern, devitalization in schizoid, schizotypal, and avoidant personality disorders, the patient's central problem is maintaining vitality when the need for affirmation or admiration has been ignored or insufficiently acknowledged. In the second pattern, in paranoid, obsessive compulsive, and borderline personality disorders, patients harbor fears that their fragile self cohesion may come undone. In the third pattern, in dependent, histrionic, and antisocial personality disorders, patients attempt but often fail to develop compensatory structures to repair their chronically injured self cohesion.
