The Dynamics of Successful Personality Development and Projection, 2/e J. R. Bhatti, 2011 **Personality Projection in the Drawing of the Human Figure** Karen Machover, 1974 **Personality Projection in the Drawing of the Human Figure** Karen Alper Machover, 1965 **Projective Techniques and Sort-Based Research Methods** Paul M.W. Hackett, James M. Suvak, Ava Gordley-Smith, 2023-04-05

Projective Techniques and Sort Based Research Methods offers a brief introductory guide to the use of these exciting innovative and often artistic approaches to students and researchers who have no prior knowledge of these. This book brings together a wide range of examples of projective and mapping techniques that offer the ideal methodology for researchers wishing to collect less controlled and filtered material that tap the deeper levels of the conscious and sub conscious to reveal a more profound richer and hidden level of response. It presents the techniques in a way that will enable the reader to appreciate their nature and to choose an appropriate method for their own research. Information is also provided that allows readers to design and implement their own projective or sort based approaches. Each of the approaches the authors present are concisely described and their usages explained along with references and examples of the applied usage of the technique. The book is valuable reading for researchers from a wide range of academic disciplines from within the social sciences humanities business studies marketing etc. The book is an introductory guide but it will be appropriate for use with undergraduate post graduate and research students. It will also be of great use to professionals working in the areas of consumer behaviour marketing and communications.

Personality Projection in the Drawing of the Human Figure Karen Alper Machover, 1949

In this book the writer will make an effort to outline a method of personality analysis based upon the interpretation of drawings of the human figure. That individuals reveal important aspects of their personality in drawing has long been recognized. What has been lacking and I trust that the work that is now being done in drawing analysis will supply is a degree of systematization of analysis of the graphic product which is at once comprehensive communicable and does justice to the intricacies of personality. of the world population has access to the internet today 2018 <https://www.internetworldstats.com> At the end of the past century this percentage was a mere 1% The growth of the internet infrastructure simultaneously spurred the development of social network applications such as Facebook Twitter Snapchat and Instagram providing accessible media for sharing photographs including photographic self portraits However despite their tremendous reach and popularity selfies have so far received relatively little attention by the scientific community especially within psychology Thus we proposed a Frontiers in Psychology Research Topic to expand empirical and theoretical work on the massively popular yet scientifically unexplored phenomenon of the selfie The articles published in this eBook offer a multifaceted insight into current scholarly work on this topic
