Personality In Intimate Relationships Socialization And Psychopathology:

Personality in Intimate Relationships Luciano L'Abate, 2005-05-11 Four decades of contributions to personality theory and family practice have earned Luciano L'Abate a worldwide reputation for therapeutic insights. Now he expands on his pathbreaking relational theory of personality to apply it to the twenty-first century family in all its configurations. Personality in Intimate Relationships showcases L'Abate's trademark elegant style and provocative ideas in his most accessible work to date. Based on Axes I and II of the DSM-IV, the book describes relationships along a readily identifiable continuum ranging from optimal functionality to severe pathology, linking the author's conceptual framework to specific diagnostic strategies, therapeutic interventions, and prevention programs. L'Abate's theory not only integrates individual and family theories and seemingly disparate schools of thought but is also inclusive of nontraditional relationships: grandparent-grandchild dyads, adoptive families, same-sex couples, and others that are often left out of the family literature. Among the key areas explored in the book: Selfhood and self-differentiation; Confrontation and sharing of hurt feelings; Negotiating bargaining and problem-solving; Dealing with distance and closeness; Intimacy and the ability to love. In addition, the reader is referred to complementary online appendices that supply helpful questionnaires, workbooks, and ideas for further applications. Personality in Intimate Relationships offers a fresh perspective to all frontline practitioners as well as investigators in this area. It is also ideal for graduate courses in abnormal psychology and personal development.

The Quick Theory Reference Guide Karin Jordan, 2007 Since the beginning of the concepts of family therapy, mental health professionals have known that the family system is a powerful source of support for change or a powerful force for resistance to change. Some professionals work with individuals, some with families, and some with groups. However, all work with the context of the systems: family, group, community, country, etc. Students, especially beginning students, are overwhelmed and confused at the variety of approaches to working with clients. Many programs introduce students to individual as well as systems concepts in the course of training. Students need assistance in learning this variety of theories. They need to be able to compare and contrast theories and techniques to determine when and where to utilize the best skills in order to facilitate client change. Dr. Karin Jordan has compiled a comprehensive text that enables the students to discover each theory as it is presented in its purist form. The text is accessible yet the content provides comprehensive knowledge of each theory. Dr. Jordan has brought together the master educators and clinicians in our fields to write about their particular expertise.

Low-Cost Approaches to Promote Physical and Mental Health Luciano L'Abate, 2007-06-06 Most physical and mental health professionals will agree that their time, space, and funds are generally in short supply even under optimal conditions. Their participants, clients, or patients too will admit to similar deficits of time and patience even with optimal motivation. Overburdened mental health facilities are trying to cope with limited budgets and overworked and underpaid personnel. Low-Cost Approaches to Promote Physical and Mental Health addresses both sides of this shortfall by offering either self-administered or easily administered

verbal and non verbal interventions designed to promote positive health behaviors while requiring little or no outside funding

Hurt Feelings Luciano L'Abate, 2011-09-26 Hurt feelings are universal and are present in human beings as well as in animals These feelings are usually avoided by human beings and overlooked by the scientific and professional mental health communities Yet if unresolved and not shared with loved ones and professionals they tend to fester in our bodies and effect our functioning If not expressed and shared with caring others anger sadness and fear are at the bottom of mental illness Developmentally each of these feelings respectively gives rise to antisocial acts depression and severe mental illness This book suggests that instead of traditional one on one face to face conversation based interventions distance writing will allow mental health professionals to assign interactive practice exercises specifically focused on hurt feelings
