Bonilla-Silva, Emily A. Haozous, Gerald Kayingo, William McDade, Lisa Meeks, Ana Núñez, Toyese Oyeyemi, Janet Southerland, Javeed Sukhera, 2024-09-18 Inequities in health care and medical education have a long and complex history involving racism sexism ableism exclusivity and other forms of social injustice Reimagining Medical Education The Future of Health Equity and Social Justice externally commissioned by the American Medical Association and part of the AMA MedEd Innovation Series explores and addresses these ongoing issues Using both theoretical and practical approaches medical educators share a vision of medical education through a social justice lens The resulting volume focuses on equity throughout medical education improving the diversity of the student faculty and health workforce and ameliorating inequitable outcomes among minoritized and marginalized patient populations This unique change oriented text From the theoretical to the practical a diverse team of authors outline what an equitable future for medical education and health care can be A thought provoking account of the negative impact of centuries of asymmetry of power As part of the AMA MedEd Innovations series an aspirational vision of a just system for recruiting training and empowering the next generation of care providers and how to impact change at the individual institutional and population levels Values in Health Care John G. Bruhn, George Henderson, 1991 Life and Death Decisions in the Clinical Setting Paul Walker, Terence Lovat, 2017-03-20 This book moves away from the frameworks that have traditionally guided ethical decision making in the Western clinical setting towards an inclusive non coercive and reflective dialogic approach to moral decision making Inspired in part by Jürgen Habermas's discourse theory of morality and principles of communicative action the book offers a proportionist approach as a way of balancing out the wisdom in traditional frameworks set in the actual reality of the clinical situation at hand Putting this approach into practice requires having a conversation a dialogue or a discourse with collaboration amongst all the stakeholders The aim of the dialogue is to reach consensus in the decision via mutual understanding of the values held by the patient and others whom they see as significant This book aims to underscore the moral philosophical foundations for having a meaningful conversation Life and Death Decision in the Clinical Setting is especially relevant in our contemporary era characterised medically by an ever increasing armamentarium of life sustaining technology but also by increasing multiculturalism a multiplicity of faiths and increasing value pluralism **Foundation of Ethics-Based Practices** Birthe Loa Knizek, Sven Hroar Klempe, 2022-01-01 This book contrasts earlier textbooks on evidence based practices Whereas the latter is a slogan that call for scientific evidence to be used in standardized treatment manuals ethics based practices call for individualized treatment that makes the situation meaningful for the patient The main argument for changing the treatment design from being evidence based to one based on ethics is the hypothesis that good health care is based on treatment which makes the situation positive and meaningful for the patient The awareness for this is primarily provided by ethical considerations *The Ethics of Health Care* Raymond S. Edge, John Randall Groves, 1994 The Ethics of Health Care is your

guide to understanding the essentials of ethical health care practice Providing a balanced background in value development and ethical theories this text introduces the reader to the basic principles and language of the sometimes controversial ethics of health care     Health Care Ethics Benedict M. Ashley, Kevin D. O'Rourke, 1982 Modern medicine has unprecedented power to heal human beings of physical and mental disease to keep them healthy and even to improve the human race This power can be used to humanize life or to dehumanize and destroy it It can be used justly to benefit all or it can be used to benefit the few at the expense of the many How to use such power is a question of values and therefore of individual and group decisions which are not merely technical but ethical Two reasons have induced us to add to the already extensive literature on medical ethical and bioethical topics First too much of this literature focuses on a few controversial but sometimes minor topics while neglecting the broader and major issues affecting human health and the health care professions Second we want to assist Christian and especially Catholic health care professionals and health care facilities faced with the difficult and often puzzling responsibility of giving witness to a long tradition of humanistic health care while working with other professionals and government agencies committed to diverse value systems from Introduction
