Ancient Advanced Technology in South America Norah

Romney,2021-02-13 There are a host of ancient ruins in South America claimed by the Inca inherited by the Inca conquered by the Inca and built by the Inca Although one label has stuck on each monument or ancient site it is clear there are many layers of construction physically and conceptually Academics and Scholars still debate who built these monuments did they inherit them Was there a Pre Inca culture but everyone can appreciate how advanced the Inca Ancient Ruins found in the highlands of South America The Inca were largest empire ever seen in the Americas and the largest in the world at that time yet doubt is cast on their monuments and origins Tiahuanaco a region of Bolivia that holds many remnants of ancient civilizations demonstrates some of the most unique and amazingly precise examples of stonework in the world The ancient people who created these walls and buildings used such a high degree of mathematical expertise that the workmanship is astounding even to modern day people They marvel at how the stone cutters from long ago created all of it with simple hand tools The high plains of Peru and Bolivia in the Andes Mountains holds a wealth of historical sites each one more amazing than the next Scholars and archaeologists had only seen the same type of masonry in ancient Egypt before this Although some historians call this Inca architecture this later time period civilization had little to do with creating these fantastic structures The Incas dominated this area from approximately the 13th to 14th centuries AD up until the time of the Spanish explorers conquest of the region Indeed they built some magnificent structures but the ones most interesting for their precision and longevity came from even older groups Some of these empires were called the Wari and the Tiahuanaco They existed hundreds or even thousands of years before the Inca came to power Multiple historians who specialize in architectural studies have dedicated a lot of their time and knowledge to figuring out how ancient groups of people who did not use advanced tools or even the wheel could create such structures The most advanced chisels and hammers of the time would have been created from copper stone and wood With these simple hand tools people dug granite andesite and porphyry out of quarries After transporting them to the final locations they then carved them with smooth precision so they would fit together almost seamlessly What techniques could these ancient experts use to make such flat and smooth surfaces exact angles and joints that would not allow a single blade of grass to squeeze between Historians can only guess about some of the methods that allowed for such unique stone cutting and building styles **Map Link Catalog** ,2006 Peru's Southern Coast Nicholas Gill,2010 Peru is one of the most diverse and fascinating countries on the planet Of the 117 life

zones on earth 84 can be found here Because of this Peru s flora and fauna is some of the most unusual on earth Scientists are only beginning to grasp just how many species exist and how many are still likely to be discovered Large areas of rainforest and mountains remain unexplored It was only in the past few decades that research began on the canopy tops the upper levels of the rainforest which have opened up a whole new world of plant and wildlife As far as history goes there is more here than anywhere else in the Americas Most have heard of the Incas and Machu Picchu but there were many large civilizations here long before the Incas the Chav n Chimu Moche Wari Nazca and Paracas Each group left their mark on the country in some way and their achievements artifacts and architecture are more impressive in many ways than that of the Incas Highlights of the Southern Coast Wine and Pisco tasting OCo Sample the world s largest Pisco producing region and some of the finest wine Peru has to offer Islas Ballestas OCo See seals frigate birds and Humboldt penguins in the poor man s Galapagos Santa Catalina Monastery OCo Walk through the secluded city within a city one of Peru s most revered Catholic landmarks Nazca Lines OCo Take a gut wrenching flight in a five seater plane for the best view of the Nazca lines The Nazca Lines 22 km 13 miles north of Nazca were made by removing the darker sun baked stones and piling them on either side of the line exposing the lighter soil Why the lines were made is still open to much debate but scientists have a fairly good idea of who made them The Paracas and Nazca peoples are believed to have created the lines between 900 BC to 600 AD It is also believed that the Huari settlers from Ayacucho made some additions in the seventh century There are literally hundreds of lines and geometric shapes that stretch for miles but the animals such as a monkey dog spider whale and several birds including a hummingbird with a wingspan of over 100 yards are the most well known There are also images of a tree hands and what is thought by some to be an astronaut Adventure OCo Trek Colca Canyon climb El Misti or raft in Cotahuasi This guide includes full details on where to stay and eat in Southern Peru plus what to see and do Also included is an extensive introduction to Peru as a whole with information about the history and culture of the country the cuisine the arts the people the flora fauna the parks reserves and the 20 top adventures Canadian Books in Print.
