Personal Values In The Modern World:

Cultural Change in Modern World History Peter N. Stearns, 2018-12-13 In this innovative textbook leading world historian Peter Stearns analyses key examples of culture change from around the world highlighting what culture change involves and how it can be explained and assessed both historically and in the contemporary world Culture change is one of the most interesting and significant features of human society but until now there has been no book for the classroom which looks explicitly at this phenomenon Cultural Change in Modern World History covers different kinds and levels of culture change since 1500 from colonial culture contact in British India to modernization in Meiji Japan and changing attitudes towards gay marriage in the past decade considering how we should define culture change how to deal with causation and how to evaluate continuities and consequences Stearns addresses fundamental questions why do groups of people change their beliefs and values and what happens when they do Conversely why do some groups resist culture change and how do some manage to combine novel and more traditional cultural components Figuring out how better to understand why groups or societies change their minds or refuse to do so provides a crucial perspective on human behaviors and values As the first book to explore this important question Cultural Change in Modern World History is a ground breaking text for students of world history cultural history and anthropology

The New World of Economics Richard B. McKenzie, Gordon Tullock, 2012-05-16 The New World of Economics 6th edition by Richard McKenzie and Gordon Tullock represents a revival of a classic text that when it was first published changed substantially the way economics would be taught at the introductory and advanced levels of economics for all time In a very real sense many contemporary general audience economics books that seek to apply the economic way of thinking to an unbounded array of social issues have grown out of the disciplinary tradition established by earlier editions of The New World of Economics This new edition of The New World will expose new generations of economics students to how McKenzie and Tullock have applied in a lucid manner a relatively small number of economic concepts and principles to a cluster of topics that have been in the book from its first release and to a larger number of topics that are new to this edition with the focus of the new topics on showing students how economic thinking can be applied to business decision making This edition continues the book s tradition of taking contrarian stances on important economic issues Economics professors have long

Democratic Deliberation in the Modern World Paul Gunn,2017-07-05 Would ordinary citizens benefit if public decisions were increasingly based on an inclusive and fair exchange of reasons rather than mere voting or choices in the market Debates amongst deliberative democrats often proceed as though this process of public reasoning is precisely what the democratic ideals of freedom and equality require Less attention has been paid to whether an inclusive and fair exchange of reasons is possible in any realistic modern setting and what the effects would be of trying to move democratic institutions in a deliberative direction To examine these effects the contributors to this collection of essays bring together a number of analyses of the practical implications of expanding deliberative processes Some consider the prevailing epistemic conditions in modern societies and their likely effects on deliberative reasoning Others discuss the politics of these societies and especially the likely effects of existing political divisions on democratic deliberation Lastly the question of what we might hope to see and what we might hope to avoid from political argument is addressed Considered together these three foci should equip readers to decide whether deliberative democracy is feasible and if so if it is desirable This book was published as a special issue of *Critical Review* Personal Values in the Modern World Montague Vaughan Castelman Jeffreys,1968
