Perspectives in Particles and Fields Maurice Lévy, Jean-Louis Basdevant, David Speiser, Jacques Weyers, Maurice Jacob, Raymond Gastmans, 2012-12-06 The 1983 Cargese Summer Institute on Particles and Fields was organized by the Université Pierre et Marie Curie Paris M LEVY and J L BASDEVANT CERN M JACOB the Université Catholique de Louvain D SPEISER and J WEYERS and the Katholieke Universiteit Leuven R GASTMANS After 1975 1977 1979 and 1981 it was the fifth time they joined their efforts for organizing this Summer Institute This school was characterized by simultaneous progress in the theory of elementary particles and by impressive experimental advances On the theoretical front one witnessed the new developments in lattice gauge theories which explore the world of strongly interacting particles in a non perturbative way and progress in a better understanding of the unity of all interactions based on supersymmetry The experimentalists were proud to announce the discovery of the intermediate vector bosons W and Z at CERN while physicists working with e e colliding beams continued to probe more deeply the validity of the theoretical models of strong weak and electromagnetic interactions We owe many thanks to all those who have made this Summer Institute possible Thanks are due to the Scientific Committee of NATO and its President for a generous grant and especially to the head of the Advanced Study Institute Program and his collaborators for their constant help and encouragement We also thank the National Science Foundation USA for their financial assistance
