Flach, Peter A. Hancock, Jeff Caird, Kim J. Vicente, 2018-04-20 There is a growing consensus in the human factors ergonomics community that human factors research has had little impact on significant applied problems Some have suggested that the problem lies in the fact that much HF E research has been based on the wrong type of psychology an information processing view of psychology that is reductionistic and context free Ecological psychology offers a viable alternative presenting a richer view of human behavior that is holistic and contextualized The papers presented in these two volumes show the conceptual impact that ecological psychology can have on HF E as well as presenting a number of specific examples illustrating the ecological approach to human machine systems It is the first collection of papers that explicitly draws a connection between these two fields While work in this area is only just beginning the evidence available suggests that taking an ecological approach to human factors ergonomics helps bridge the existing gap between basic research and applied problems *The Routledge Companion to Ecological Design Thinking* Mitra Kanaani, 2022-08-31 This companion investigates the ways in which designers architects and planners address ecology through the built environment by integrating ecological ideas and ecological thinking into discussions of

Sourcebook of Family Theories and Methods Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 1993-03-31 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production

Examining fracking from the perspective of political ecology Lee Hooper, 2013-09-27 Seminar paper from the year 2013 in the subject Ethnology Cultural Anthropology grade 1 Massey University New Zealand language English abstract Throughout the modern era particularly with the development of new and innovative technologies conflict has existed between the environment and those who inhabit it With the advent of highly industrialised technology during the 20th century conflict has been on a steady increase as there are often dialectical processes involved between those creating technological innovations and those who become unwittingly involved in them One environmental conflict called hydraulic fracturing or fracking as it is commonly

referred to is a profitable industrial practice whereby natural gas is extracted from rock layers in the ground Fracking is an environmental conflict arising from economic and political marginalisation based primarily on class divisions This will be demonstrated first through describing fracking and how it is an environmental conflict by explaining how fracking fits into a political and economic framework and by finally outlining the cultural component that is how marginalised socio economic and ethnic groups are affected by the practice of fracking Political ecology theory will be applied in order to gain an understanding of the complexities of fracking as this theory focuses on the mutual development of both political and ecological change It is acknowledged that whilst applying a political ecology perspective is an effective anthropological method it is also necessary to apply other anthropological theories in order to gain a more holistic analysis
