Pushbutton Fantasies:

Cyber-Marx Nick Dyer-Witheford, 1999 In this highly readable and thought provoking work Nick Dyer Witheford assesses the relevance of Marxism in our time and demonstrates how the information age far from transcending the historic conflict between capital and its laboring subjects constitutes the latest battleground in their encounter Dyer Witheford maps the dynamics of modern capitalism showing how capital depends for its operations not just on exploitation in the immediate workplace but on the continuous integration of a whole series of social sites and activities from public health and maternity to natural resource allocation and the geographical reorganization of labor power He also shows how these sites and activities may become focal points of subversion and insurgency as new means of communication vital for the smooth flow of capital also permit otherwise isolated and dispersed points of resistance to connect and combine with one another Cutting through the smokescreen of high tech propaganda Dyer Witheford predicts the advent of a reinvented autonomist Marxism that will rediscover the possibility of a collective communist transformation of society Refuting the utopian promises of the information revolution he discloses the real potentialities for a new social order in the form of a twenty first century communism based on the common sharing of wealth

Mensch und Computer im Jahre 2000 HAEFNER, 2013-10-05 Allzulange wurde in der Bundesrepublik Deutschland die Dimension des Wandels der mit der Verbreitung neuer Informations und Kommunikationstechniken verbunden ist unterschätzt Den einen galt der Computer nur als eine neue technische Spielart deren Integration in den Alltag des einzelnen problemlos zu bewältigen sei Andere glaubten unsere Gesellschaft gänzlich vor den neuen Technologien laquo bewahren raquo zu können wenn ihre unterstellten negativen Auswirkungen nur lange und undifferenziert genug postuliert würden Beide Positionen haben sich als falsch und der konzeptuellen Aufarbeitung der

Problembereiche nicht dienlich erw sen Die Technik ist da sie erfa t mit immer gr erer Ver n rungsgeschwindigkeit fundamentale Lebenszusammenh nge und schafft unumst liche Fakten Politik und Gesellschaft hingegen stehen erst am Anfang des m hseligen Weges wirtschaftliche und soziale Anpassungsformen zu finden und nach neuen Leitb dern zu suchen In diesem Buch wird die zu erwartende technische Entwi lung konsequent in den politischen wirtschaftlichen kulturellen und sozialen Raum hinein weitergedacht Insofern ist es ein n wendiges freilich auch ein notwendig unbequemes Buch Viele Folgerungen erscheinen in ihrer radikalen Abweichung von wohnten Denkmustern zun chst erschreckend Da ihnen jedoch ein hohes Ma an systematischer Logik innewohnt erkennt schnell wer versucht mit rationalen Argumenten zu anderen Ergebnissen zu gelangen **Regionalentwicklung in der Kommunikationsgesellschaft** ,2013-03-13

Kommunikationsgesellschaft bezeichnet nach Dienstleistungs Wissens und Informationsgesellschaft das aktuelle Stadium der Entwicklung in der auch der Regionalbezug neue Aktualit t erlangt Es zeigt sich da der Modernit tsgrad einer Region von einer Reihe von Faktoren abh ngt wie Infrastruktur Bildungsniveau Lebens und Umweltqualit t Forschung Innovationsdynamik Wirtschaftskraft und politische Kultur Besonders das Vorhandensein von Hochqualifizierten unter Bedingungen ansprechender Lebens und Umweltqualit t im Konzext einer entfalteten Industrie und Wissenschaftsstruktur erweist sich als defining factor **The Information Society** Robert Hassan,2013-04-25

What are we to make of the information society Many prominent theorists have argued it to be the most profound and comprehensive transformation of economy culture and politics since the rise of the industrial way of life in the 18th century Some saw its arrival in a positive light where the dreams of democracy of connectivity and efficiency constituted a break with the old ways But other thinkers viewed it more in terms of the recurrent nightmare of capitalism where the processes of exploitation commodification and alienation are given much freer rein than ever before In this book Robert Hassan a prominent theorist in new media and its effects analyses and critically appraises these positions and forms them into a coherent narrative to illuminate the phenomenon Surveying the works of major information society theorists from Daniel Bell to Nicholas Negroponte and from Vincent Mosco to Manuel Castells The Information Society is an invaluable resource for understanding the nature of the information society as well as the meta processes of neoliberal globalisation and the revolution in information technologies that made it possible Am Ende Video, Video am Ende? Massenkommunikation ,1984 Saying Goodbye Anita G. Schmukler,2013-05-13 Termination of psychoanalysis or psychotherapy is centrally important both to the process of treatment and to the patient s experience of treatment It is surprising then that there has heretofore been no comprehensive study of the subject This book begins to bridge the gap in this area It is the first volume devoted entirely to issues surrounding the ending of treatment in analytic and therapeutic work with children and adolescents Organized into separate clinical and theoretical sections framed by a preface and sectional introductions and covering a wide range of psychopathology this book explores the different ways in which children

and adolescents grapple with the experience of separation at the conclusion of treatment Of special note is the contributors recognition that the parents of children ending treatment face their own termination experience in relinquishing the support of their child s therapist The presentations are enriched as well by frank discussions of countertransference as it enters into the termination phase of treatment *The Hand in Your Pocket May Not be Your Own* Levon Chorbajian,1991
