Quantity and Quality in Economic Research Roy Brown, 1988-05-01 **QUANTITY AND QUALITY IN ECONOMIC RESEARCH**, 1985 **Quantity and Quality in Economic Research** International Conference on Quantity and Quality in Economic Research, 1985 Quantity and Quality in Economic Research Roy Brown, 1985 **Towards a Better Global Economy** Franklin Allen, Jere R. Behrman, Nancy Birdsall, Shahrokh Fardoust, Dani Rodrik, Andrew Steer, Arvind Subramanian, 2014-09-04 Substantial progress in the fight against extreme poverty was made in the last two decades But the slowdown in global economic growth and significant increases in income inequality in many developed and developing countries raise serious concerns about the continuation of this trend into the 21st century The time has come to seriously think about how improvements in official global governance coupled with and reinforced by rising activism of global citizens can lead to welfare enhancing and more equitable results for global citizens through better national and international policies This book examines the factors that are most likely to facilitate the process of beneficial economic growth in low middle and high income countries It examines past present and future economic growth demographic changes the hyperglobalization of trade the effect of finance on growth climate change and resource depletion and the sense of global citizenship and the need for global governance in order to draw longer term implications identify policy options for improving the lives of average citizens around the world and make the case for the need to confront new challenges with truly global policy responses The book documents how demographic changes convergence and competition are likely to bring about massive shifts in the sectoral and geographical composition of global output and employment as the center of gravity of the global economy moves toward Asia and emerging economies elsewhere It shows that the legacies of the 2008 09 crisis high unemployment levels massive excess capacities and high debt levels are likely to reduce the standard of living of millions of people in many countries over a long period of adjustment and that fluctuations in international trade financial markets and commodity prices as well as the tendency of institutions at both the national and international level to favor the interests of the better off and more powerful pose substantial risks for citizens of all countries The chapters and their policy implications are intended to stimulate public interest and facilitate the exchange of ideas and policy dialogue Quantity and Quality in Economic Research Theologos Homer Bonitsis, Roy Chamberlain Brown, 2019-01-04 First published in 1997 this volume responded to a current national concern with quality control Part 1 addresses issues including the US trade deficit international lending to Brazil and the traditional theory of international finance Part 2 explores topics such as the history of statistics in the West and former East and the haphazard axiomatic methodological basis of traditional econometrics Finally part 3 consists of 7 papers on applied economics and finance including predicting the success of takeover bids and an examination of the economic determinants of juvenile crime in New York City **Strategic Factors in Nineteenth Century American Economic History** Claudia Goldin, Hugh Rockoff, 2008-04-15 Offering new research on strategic factors

in the development of the nineteenth century American economy labor capital and political structure the contributors to this volume employ a methodology innovated by Robert W Fogel one of the leading pioneers of the new economic history Fogel s work is distinguished by the application of economic theory and large scale quantitative evidence to long standing historical questions These sixteen essays reveal by example the continuing vitality of Fogel s approach The authors use an astonishing variety of data including genealogies the U S federal population census manuscripts manumission and probate records firm accounts farmers account books and slave narratives to address collectively market integration and its impact on the lives of Americans The evolution of markets in agricultural and manufacturing labor is considered first that concerning capital and credit follows The demography of free and slave populations is the subject of the third section and the final group of papers examines the extra market institutions of governments and unions
