## **Selections From Just So Stories:**

How Women Got Their Curves and Other Just-So Stories David P. Barash, Judith Eve Lipton, 2009 The authors demonstrate the pleasure of using evolutionary theory to help make sense of some puzzling aspects of the anatomy physiology and behaviour of women

How the Just So Stories Were Made John Batchelor, 2021-05-11 A fascinating richly illustrated exploration of the poignant origins of Rudyard Kipling's world famous children's classic *From How the Leopard Got Its Spots to The Elephant's Child* Rudyard Kipling's Just So Stories have delighted readers across the world for more than a century In this original study John Batchelor explores the artistry with which Kipling created the Just So Stories using each tale as an entry point into the writer's life and work including the tragedy that shadows much of the volume the death of his daughter Josephine Batchelor details the playful challenges the stories made to contemporary society In his stories Kipling played with biblical and other stories of creation and imagined fantastical tales of animals development and man's discovery of literacy Richly illustrated with original drawings and family photographs this account reveals Kipling's public and private lives and sheds new light on a much loved and tremendously influential classic

Just So Stories Rudyard Kipling, 2010-03-02 Kipling's own drawings with their long funny captions illustrate his hilarious explanations of *How the Camel Got His Hump* *How the Rhinoceros Got His Skin* *How the Armadillo Happened* and other animal *How's He* began inventing these stories in his American wife's hometown of Brattleboro Vermont to amuse his eldest daughter and they have served ever since as a source of laughter for children everywhere

British Books, 1904

The New Evolutionary Sociology Jonathan Turner, Richard Machalek, 2018-03-09 For decades evolutionary analysis was overlooked or altogether ignored by sociologists Fears and biases persisted nearly a century after Auguste Comte gave the discipline its name as did concerns that its effect would only reduce sociology to another discipline whether biology psychology or economics Worse apprehension that the application of evolutionary theory would encourage heightened perceptions of racism sexism ethnocentrism and reductionism pervaded Turner and Machalek argue instead for a new embrace of biology and evolutionary analysis Sociology from its very beginnings in the early 19th century has always been concerned with the study of evolution particularly the transformation of societies from simple to ever more complex forms By comprehensively reviewing the original ways that sociologists applied evolutionary theory and examining the recent renewal and expansion of these early approaches the authors confront the challenges posed by biology neuroscience and psychology to distinct evolutionary approaches within sociology They emerge with key theoretical and methodological discoveries that demonstrate the critical and compelling case for a dramatically enriched sociology that incorporates all forms of comparative evolutionary analysis to its canon and study of sociocultural phenomena

Unravelling the Evolution of Language Rudolf P. Botha, 2021-11-22 What blocks the way to a better understanding of language evolution it is widely held is above all a paucity of factual evidence Not so argues *Unravelling the Evolution of Language* This book finds the main obstacle instead in a poverty of a specific kind of

theory restrictive theory It shows too that this poverty of restrictive theory is one of the root causes of the paucity of factual evidence Unravelling takes it that a theory of a thing T for example language is restrictive if it gives us a basis for distinguishing T in a non arbitrary way from all things that are in fact distinct from it including those that happen to be related to it The book then argues in detail that much of the recent work on language evolution proceeds from loose assumptions rather than restrictive theories about a number of crucial things The entities prelinguistic or linguistic that are believed to have undergone evolution the processes by which these entities are believed to have evolved the ways in which these pre linguistic entities link up with entities that are believed to be correlates of them the sources of data that are believed to yield indirect evidence about the evolution of language and the factors that add to or subtract from the scientific substance of accounts of language evolution In support of its main argument Unravelling the Evolution of Language puts forward detailed analyses of various recent accounts of language evolution including co optationist accounts by Noam Chomsky Stephen Jay Gould Massimo Piattelli Palmarini and Lyle Jenkins preadaptationist accounts by Philip Lieberman Wendy Wilkins Jenny Wakefield Andrew Carstairs McCarthy William Calvin and Derek Bickerton adaptationist accounts by Steven Pinker Paul Bloom and others This means that Unravelling as it builds its main argument also offers an appraisal of some significant contributions to recent work on language evolution
