Self Help Housing A Critique:

Self-help Housing, the Poor, and the State in the Caribbean Robert B. Potter, Dennis Conway, 1997 This collection of essays represents the first in depth scholarly treatment of housing policies and conditions throughout the Caribbean The contributors consider both the performance of the state and the autonomous activities of the poor making this volume an invaluable contribution to future planning and debate The essays each dealing with a specific island or group of islands collectively address four main themes the history of housing provision since colonization current housing conditions state policies toward housing provision and the changing relationships between governments international funding agencies the private housing sector and the peoples responses These investigations not only highlight the often alarming problems that Caribbean nations face in providing adequate housing for the poor but also implicate governments in past and present failures and poor performances However the essays are also filled with useful insights about the ways in which progressive housing policies can be formulated and implemented For example the volume suggests that the Caribbean s rich heritage of folk and vernacular architectural styles should be taken into serious account in future planning efforts In a concluding synthesis chapter the volume editors argue that a more progressive future is attainable if all parties exhibit the political will that the poor have already demonstrated

Beyond Self-help Housing Kosta Math  y,1992 According to the editor The debate about self help housing and its potential contribution to solving the housing problem is at least 50 years old The term refers to the concept that inhabitants must have a part in the planning and running of housing projects enabled by government and supported by industry and commerce It is a concept that is still evolving as theory and practical experience intersect Nineteen contributions detail new thinking and case studies Annotation copyrighted by Book News Inc Portland OR

Resource Sustainability and Caribbean Development Duncan F. M. McGregor,David Barker,Sally Lloyd-Evans,1998 Resource Sustainability and Caribbean Development follows on from Barker and McGregor s earlier edited volume Environment and Development in the Caribbean Geographical Perspectives 1995 and aims to focus more specifically on the theme of sustainability and to examine research contributions of geographers to problems of sustainability in the Caribbean region While the problems of environmental degradation have increased in recent decades the ability of Caribbean governments to cope with the consequences appears to have been eroded There is however a growing recognition within the region of the need for development strategies that focus on the social needs of the people yet simultaneously protect the fragile natural environment It is hoped that the research presented here will serve to inform the wider research and decision making community of the main problems associated with resource sustainability in the region and of some of the major research directions crucial to the alleviation of these problems Preface

Living on the Margins: Social Access to Shelter in Urban South Asia Navtej K. Purewal,2024-11-01 This title was first published in 2000 The privatization of former social state housing through recent public private partnerships is becoming increasingly prevalent in Third World as well as in Western countries In most Third World countries this shift has had profound effects upon the patterns of access of shelter Drawing on studies of South Asian and other Third World contexts as well as original in depth empirical research from Amritsar a city in North West India this book offers an analysis of the withdrawal of state housing provision It develops and applies a unique model based on social status to analyze the new routes of access to housing and land by the urban poor Its conclusions argue that these new privatization policies largely rely upon already existing informal and self help settlements which continue to attract the poor and to be the largest housing providers in many cities thus providing a ready made safety net for such policies The inter linkages between the private state and the public market make up a highly diversified and complex picture of shelter arrangements being accessed by the poor which is reflected in the social differentiation and increasingly stratified housing market The book argues that these partnership policies therefore have long term implications upon social patterns of inclusion and exclusion which must be addressed

The Challenge of Slums United Nations Human Settlements Programme,2012-05-23 The Challenge of Slums presents the first global assessment of slums

emphasizing their problems and prospects Using a newly formulated operational definition of slums it presents estimates of the number of urban slum dwellers and examines the factors at all level from local to global that underlie the formation of slums as well as their social spatial and economic characteristics and dynamics It goes on to evaluate the principal policy responses to the slum challenge of the last few decades From this assessment the immensity of the challenges that slums pose is clear Almost 1 billion people live in slums the majority in the developing world where over 40 per cent of the urban population are slum dwellers The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities governments civil society and the international community This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes The Global Report on Human Settlements is the most authoritative and up to date assessment of conditions and trends in the world s cities Written in clear language and supported by informative graphics case studies and extensive statistical data it will be an essential tool and reference for researchers academics planners public authorities and civil society organizations around the world
