## **Selfish Generations The Aging Of The Welfare State:**

**Selfish Generations?** David Thomson, 2015-12-23 Our present welfare state has little good reason to survive much longer and we will have to find a new basis for its continued existence So writes David Thomson as he offers an unflinching perspective on how different generations have fared under the social welfare policies of governments since the 1930s *Selfish Generations* is a critical and unsentimental analysis of a key political issue and the questions it raises about support for the young and old and about health education and housing policy are exactly those facing politicians and social welfare policy developers today

**Verteilungsprobleme und Gerechtigkeit in modernen Gesellschaften** Stefan Liebig, Holger Lengfeld, Steffen Mau, 2004

*Age in the Welfare State* Julia Lynch, 2006-06-05 This book asks why some countries devote the lion's share of their social policy resources to the elderly while others have a more balanced repertoire of social spending Far from being the outcome of demands for welfare spending by powerful age based groups in society the age of welfare is an unintended consequence of the way that social programs are set up The way that politicians use welfare state spending to compete for votes along either programmatic or particularistic lines locks these early institutional choices into place So while society is changing aging divorcing moving in and out of the labor force over the life course in new ways social policies do not evolve to catch up The result in occupational welfare states like Italy the United States and Japan is social spending that favors the elderly and leaves working aged adults and children largely to fend for themselves

The Welfare State in Post-Industrial Society Jason L. Powell, Jon Hendricks, 2009-06-10 In recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe Multinational corporations NGOs and other international organizations have begun to influence social policy at a national and local level Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level With contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state The *Welfare State in Post Industrial Society* is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization The *Welfare State in Post Industrial Society* seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations

Selfish Generations? David Thomson, 2015

**Neoliberalising Old Age** John Macnicol, 2015-09-29 Governments are encouraging later life working and state pension ages are being raised There is also a growing debate on intergenerational equity and on ageism age discrimination John

Macnicol one of Europe's leading academic analysts of old age and ageing examines the effect of neoliberalism on the recent ageing and social policy agenda in the UK and the USA. He argues that the demographic and economic impulses behind recent policy changes are in fact less important than the effect of neoliberalism as an ideology which has caused certain key problems to be defined in a particular way. The book outlines past theories of old age and examines pensions reform, the debate on life expectancy, gains, the causes of retirement, the idea of intergenerational equity, the current debate on ageism, age discrimination and the likely human consequences of raising state pension ages.

**International Perspectives on Aging** George J. Alexander, 2023-07-24. Although the legal problems of the elderly are as old as humankind, they have taken on current prominence for another reason: lifespan has increased markedly in recent years. Persons who would have been the elders of the past and would have been expected to be focused on their imminent death are now as a group robust and well. They have better survived the ravages of time than have the plans fashioned when life expectancy was much lower. Questions concerning social status, expectations of living standards, general assistance and medical care all have become far more important and considerably more difficult. As life has become longer and death more controllable, the issue of a person's right to choose death over diminished quality of life has also become far more complicated. This interesting book provides the reader with a selection of perspectives from scholars in different parts of the world on various branches of elderlaw. Questions of social obligations to elders and elders' rights and duties are addressed as they arise in the United States, Japan, Greece, New Zealand, the Netherlands, Canada and England. The compilation does not attempt to map out the field nor to make country-by-country comparisons of the issues discussed. Rather, it shows some commonality of concerns and in the identification of problems and proposals for their solution.

**Family and the Welfare State in Europe** Agnes Blome, Wolfgang Keck, Jens Alber, 2009-01-01. The book offers a genuine and innovative research direction that explores the black box of intergenerational relations and in particular how institutions mediate families' ability to offer financial resources as well as provide care services to their members. Antonis Roumpakis, *Journal of Social Policy*: the book is an impressive effort from which both students and academics will benefit, as this reader indeed has. Svein Olav Daatland, *Ageing and Society*: Most European countries are experiencing a dramatic demographic shift. A combination of falling birthrates and rising life expectancy leads to a significant aging of societies. The authors analyze how the state and the family shape generational living conditions in Germany, France, Italy and Sweden and how age-specific attitudes toward welfare policy are affected. One finding is that there is little evidence of conflict between the generations. The book is a very important contribution to a better understanding of the character of new challenges for European welfare states. Stein Kuhnle, *The University of Bergen, Norway* and the Hertie School of Governance, Germany: This insightful book explores the role of both the family and the state in shaping the living conditions of the young and old in Europe. It provides a comparative theoretical and empirical analysis of age-related policies and welfare arrangements in Germany, France, Italy and Sweden. By combining institutional data on

changes in public policies with longitudinal micro data on living arrangements and informal support patterns in families the authors are able to demonstrate the huge diversity in the organization of intergenerational relations and the changes that have occurred since the early 1990s Age specific differences in attitudes towards current social policy issues are also explored The key finding is that intergenerational bonds of solidarity remain robust meaning predictions of a potential conflict between the generations are vastly exaggerated Providing up to date information on the perception of public policies and generational conflicts in different welfare states this book is a must read for researchers in the field of comparative social policy and intergenerational relations It will also benefit academics in sociology and political science as well as policy makers and consultants     **Toward a cultural history of aging** Christoph Conrad,Hans-Joachim von Kondratowitz,1993

**The Age of Welfare** Julia F. Lynch,2002     Das Alter im Spiel der Generationen Peter Gutschner,2000 Historical and social science contributions     The New Zealand Journal of History ,2006     The New Generations of Europeans Wolfgang Lutz,Rudolf Richter,Christopher Wilson,2006 First Published in 2006 Routledge is an imprint of Taylor Francis an informa company     **After Liberalism** William Douglas Gairdner,1998     *Pensionsreformen* Christopher Prinz,1999     **An Aging World** John Eekelaar,David Pearl,1989 The rapidly increasing proportion of elderly in the world s population is creating a demographic structure unprecedented in world history This volume provides the first critical examination on an international basis of the problems facing legal and social systems as a result of these demographic changes Experts analyze population trends and their relationship to world population policies and structures consider how family support systems cope with these changes and address a wide range of legal and social problems connected with policies toward the elderly     **The Political Economy of Population Ageing** William A. Jackson,1998 Examines the issue of population ageing within a broad context which includes arguments from social gerontology and sociology Explores informal economic activities and their impact on the evaluation of demographic change     *Philosophy, Politics and Society: Justice between age groups and generations* Peter Laslett,1956     *Ageing Society* Rajarshi Ghosh,2005 This book examines how advances in medical science healthcare and increased longevity have given rise to an Ageing Population The 21st century faces an ageing society but can it sustain the peaceful coexistence of all generations and extend economic se     **Michigan Journal of International Law** ,1997
