Selected Works 1990-1994:

Selected Works, 1990-1994 Merrill A. McPeak, 1995 General Merrill A McPeak became the 14th chief of staff of the Air Force in the fall of 1990 as the nation was beginning to adjust to the reality of Western victory in the cold war Desert Shield was ongoing Desert Storm was only a few weeks away other international crises Bosnia Somalia Rwanda Haiti lay ahead A significant downsizing of resources available to the Air Force had been under way for half a decade and there was every reason to believe this trend would continue In such circumstances the Air Force could have adopted a wait and see attitude just doing the best job they could with the hand they were dealt Instead General McPeak launched the most far reaching reorganization in the Air Force s history often getting ahead of change at a pace that confounded the Air Force rank and file This volume is a collection of documents authored by General McPeak These documents cover the period from late October 1990 when he was confirmed as chief of staff to March 1995 after his retirement from active service Many of the documents are speeches but there also are briefings messages congressional testimony a press conference transcript a letter to the president elect two magazine articles an Air Force policy directive and the only letter to an editor written by the general during his tenure Each document presents an account of his perspective on an important issue Together these documents add up to a body of work that at the same time is both wide ranging and has an impressive constancy of themes 88 figures

Creech Blue James C. Slife, 2004 Colonel Slife chronicles the influence of the late Gen Wilbur L Bill Creech 7a leader visionary warrior and mentor 7in the areas of equipment and tactics training organization and leader development His study serves both to explain the context of a turbulent time in our Air Force s history and to reveal where tomorrow s airmen may find answers to some of the difficult challenges facing them today Colonel Slife who addresses such controversial topics as the development of the Army s AirLand Battle doctrine and what it meant to airmen is among the first to describe what historians will surely see in years to come as the revolutionary developments of the late 1970s early 1980s and General Creech s central role Creech Blue enlightens the Air Force on its strongly held convictions during that period and challenges the idea that by 1990 when Iraq invaded Kuwait the Air Force had forgotten how to wage a strategic air campaign and was dangerously close to plunging into a costly and lengthy war of attrition had it not been for the vision of a small cadre of thinkers on the Air Staff In exploring the doctrine and language of the decade leading up to Operation Desert Storm Colonel Slife reveals that the Air Force was not as shortsighted as many people have argued **Landpower in the Long War** Jason W. Warren, 2019-06-14 War and landpower s role in the twenty first century is not just about military organizations tactics operations and technology it is also about strategy policy and social and political contexts After fourteen years of war in the Middle East with dubious results a diminished national reputation and a continuing drawdown of troops with perhaps a future force increase proposed by the Trump administration the role of landpower in US grand strategy will continue to evolve with changing geopolitical situations Landpower in the Long War Projecting Force After 9 11 edited by Jason W

Warren is the first holistic academic analysis of American strategic landpower. Divided into thematic sections, this study presents a comprehensive approach to a critical aspect of US foreign policy as the threat or ability to use force underpins diplomacy. The text begins with more traditional issues such as strategy and civilian military relations and works its way to more contemporary topics such as how socio-cultural considerations affect the landpower force. It also includes a synopsis of the suppressed Iraq report from one of the now retired leaders of that effort. The contributors, made up of an interdisciplinary team of political scientists, historians, and military practitioners, demonstrate that the conceptualization of landpower must move beyond the limited operational definition offered by Army doctrine in order to encompass social changes, trauma, the rule of law, acquisition of needed equipment, civil-military relationships, and bureaucratic decision-making, and argue that landpower should be a useful concept for warfighters and government agencies. *The Pentagon and the Presidency* Dale Roy Herspring, 2005. A fascinating account from the military's perspective of the historically tense and at times outright antagonistic relations between senior military leaders and American presidents and their advisors. Closely examines and grades the impact of presidential styles on the military's view of the president. **The Quick Response Air Force** G. Larry Thompson, 1996. In his National Security Strategy, President William J. Clinton emphasized that the United States will remain globally engaged for many years to come and that an integral part of that engagement will be the projection of military power. In the midst of budget cuts, personnel reductions, and base closures, the United States Department of Defense (DOD) is in a dilemma. It is being called on to be the dominant instrument of power in many regions of the world while its people and equipment are being stretched to their limits. Senior leaders are expressing serious concern for the operations tempo and are looking for relief. Unfortunately, the post-cold war multipolar world is producing complex and unpredictable challenges with no end in sight. The DOD is being tasked to deter aggression, provide regional stability, support emerging democracies, and provide disaster relief. In many cases, these tasks depend heavily on a forward presence. Prior to base closures and drawdowns, much of this presence was in the form of permanent overseas bases and large numbers of forces transported to any place in the world. This is no longer the case, and the question now is how to efficiently and effectively meet these challenges. Airpower offers the balanced solution. Its responsiveness, global reach, and flexibility generally give it an advantage over other military instruments in unexpected crises. Airpower is becoming the dominant quick response weapon of choice in joint operations for the National Command Authorities (NCA). This study asks: How should the US military structure its forces to provide the NCA an on-call, sustainable, and responsive airpower force worldwide? This analysis concludes the answer is to reorganize existing forces into a Quick Response Airpower Force (QRAF). The QRAF concept involves a force structure that can help reduce the operations tempo in the DOD by replacing forward presence with a credible continental United States-based quick response. *Index to American Reference Books Annual, 1990-1994* D. Cohen, 2001 This book focuses on the unique and vital capabilities of the US Air Force's KC 135 tanker fleet It analyzes historic and current tanker usage tanker operational employment and the capability of today's tanker fleet with emphasis on force structure and force management In light of decreasing budgets aging airframes increase downtime for maintenance and an explosion in the operations tempo this paper proposes a four pronged methodology addressing tanker

vision organization training and employment as the correction needed to get the KC 135 weapon system back on centerline This will allow the tanker to effectively aid the Air Force in successfully deterring conflict and if needed quickly win the nation s future wars Airmen and Air Theory Phillip S. Meilinger,2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America s greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done National Art-Collections Fund Review National Art-Collections Fund (Great Britain),1995 Public Investment Programmes, 1990-1994 Papua New Guinea.
