## Selectivities In Lewis Acid Promoted Reactions:

Selectivities in Lewis Acid Promoted Reactions Dieter Schinzer, 2012-12-06 The ASI workshop on Selectivities in Lewis Acid Promoted Reactions held in the Emmantina Hotel in Athens Glyfada Greece October 27 1988 was held to bring some light into the darkness of Lewis acid induced processes As such the workshop reflects some current trends in organic synthesis where Lewis acids are becoming a powerful tool in many different modern reactions e g Diels Alder reactions Ene reactions Sakurai reactions and in general silicon and tin chemistry The objective of this meeting was to bring together most of the world experts in the field to discuss the major reactions promoted by Lewis acids Organic synthesis will play a major role in this book connected with some fundamental mechanistic work on allylsilane and tin chemistry Both natural product synthesis and unnatural molecules are presented in the chapters The book presents all the 15 invited lectures and the contributions of 15 posters I am confident that the material presented in this book will stimulate the chemistry which has been discussed on our meeting around the world The meeting and the book were only possible through a grant of the NATO Scientific Affairs Division and financial support by the following companies Kali Chemie Hannover W Germany E Merck Darmstadt W Germany Sandoz Basel Switzerland Schering Berlin W Germany

Pons, 1995-11-21 Lewis acids provide inexpensive access to elaborated molecules obtained with high selectivities regio stereo and enantioselectivity Lewis Acids and Selectivity in Organic Synthesis is the first book to deal with these new and promising roles of Lewis acids The book begins with general considerations on Lewis acids and a description of Lewis acid carbonyl complexes which are involved in most of the reactions described ene reactions allylsilane and allyltin addition to carbonyl compounds addition of nucleophiles to acetals conjugated addition of allylsilanes and allyltins to unsaturated carbonyl compounds Sakurai reaction and Diels Alder reaction Subsequent chapters examine these issues in detail with special attention given to the way Lewis acids induce diastereo and enantioselectivity The extensive use of schemes approximately 1000 ensures rapid visual uptake of the information Lewis Acids and Selectivity in Organic Synthesis serves as a valuable source of information for all who face the challenge of selectivity in organic synthesis
