**The National Habitus** Marie-Pierre Le Hir, 2014-08-27 Stories about border crossers illegal aliens refugees that regularly appear in the press everywhere point to the crucial role national identity plays in human beings' lives today The National Habitus seeks to understand how and why national belonging became so central to a person's identity and sense of identity Centered on the acquisition of the national habitus the process that transforms subjects into citizens when a state becomes a nation state the book examines this transformation at the individual level in the case of nineteenth century France Literary texts serve as primary material in this study of national belonging because as Germaine de Staël pointed out long ago literature has the unique ability to provide access to inner feelings The term habitus in the title of this book signals a departure from traditional approaches to nationalism a break with the criteria of language race and ethnicity typically used to examine it It is grounded instead in a sociology that deals with the subjective dimension of life and is best exemplified by the works of Norbert Elias 1897-1990 and Pierre Bourdieu 1931-2002 two sociologists who approach belief systems like nationalism from a historical instead of an ethical vantage point By distinguishing between two groups of major French writers three who experienced the 1789 Revolution firsthand as adults Olympe de Gouges Françoise Renée de Chateaubriand and Germaine de Staël and three who did not Stendhal Prosper Mérimée and George Sand the book captures evolving understandings of the nation as well as thoughts and emotions associated with national belonging over time Le Hir shows that although none of these writers is typically associated with nationalism all of them were actually affected by the process of nationalization of feelings thoughts and habits irrespective of aesthetic preferences social class or political views By the end of the nineteenth century they had learned to feel and view themselves as French nationals they all exhibited the characteristic features of the national habitus love of their own nation distrust and/or hatred of other nations By underscoring the dual contradictory nature of the national habitus the book highlights the limitations nation-based identities impose on the prospect for peace
