You and Your Profile Hans-Georg Moeller, Paul J. D'Ambrosio, 2021-05-25 More and more we present ourselves and encounter others through profiles A profile shows us not as we are seen directly but how we are perceived by a broader public As we observe how others observe us we calibrate our self presentation accordingly Profile based identity is evident everywhere from pop culture to politics marketing to morality But all too often critics simply denounce this alleged superficiality in defense of some supposedly pure ideal of authentic or sincere expression This book argues that the profile marks an epochal shift in our concept of identity and demonstrates why that matters *You and Your Profile* blends social theory philosophy and cultural critique to unfold an exploration of the way we have come to experience the world Instead of polemicizing against the profile Hans Georg Moeller and Paul J D Ambrosio outline how it works how we readily apply it in our daily lives and how it shapes our values personally economically and ethically They develop a practical vocabulary of life in the digital age Informed by the Daoist tradition they suggest strategies for handling the pressure of social media by distancing oneself from one's public face A deft and wide ranging consideration of our era's identity crisis this book provides vital clues on how to stay sane in a time of proliferating profiles

Mind Shapes Alan R. Kahn, Kris Austen Radcliffe, 2005-03-30 In our everyday encounters we are continuously challenged by people who think and respond in ways different from ourselves Each one of us pays attention to different aspects of life interprets experiences differently understands certain issues better than others communicates with differing styles and uses different criteria for judging and believing others Parents of a family with several children are usually amazed by the diverse ways in which the children develop Managers are confounded by the unexpected misunderstandings among themselves and those they manage Educators find it difficult to account for the broad spectrum of students' responses to a single course of study And in relationships one is often perplexed at the ways in which common everyday words are sometimes interpreted Those of us who study the ways in which people interact continue to marvel at the differences people bring to thinking and communicating For the past 20 years Dr Kahn has led a team of scientists in in depth studies of the different brain processes leading to the different types of information processing in

people This research has developed tools which can measure how people reveal the structure of their thought processes in the flow of their communications This has enabled the team to develop a model that organizes cognitive structures according to a new paradigm one that explicitly shows the connections between cognition input and output This paradigm identifies sixteen different ways in which people process information and describes the underlying brain mechanisms which are responsible Further Mind Shapes presents how these differences developed through the stages of human evolution and the way they are expressed in the steps of modern child development Theory and practicum come together as Mind Shapes links physiology of information processing to behavior and shows how different people communicate learn and make decisions This model has been successfully applied to education management consumer communications and psychological counseling dimensions of life where understanding human behavior and motivation are critical to success Mind Shapes provides its readers with useful tools which were developed as a result of this experience
