Globalized Sport Management in Diverse Cultural Contexts James J. Zhang, Brenda G. Pitts, 2019-04-05 Cross cultural management is an important facet of the globalized sport industry Sport managers must be skilled at working with individuals from diverse cultures and aware of the key issues affecting sport on a global level This book brings together cutting edge research from leading sport scholars from around the world to illuminate some of those important issues and to demonstrate what cross cultural management looks like in a sporting context Presenting case studies from countries as diverse as the US Brazil Poland and Venezuela and across a range of sports from football to basketball the book presents new empirical material derived from a range of inquiry protocols including both qualitative and quantitative methods It offers critical analyses of cross cultural and managerial issues in key areas such as group cohesiveness group communications and misperception and misinterpretation Making an important contribution to our understanding of both theory and practice in sport management this book is fascinating reading for any student researcher or practitioner with an interest in global and international sport

Big-Time Sports in American Universities Charles T. Clotfelter, 2011-03-07 For almost a century big time college sport has been a wildly popular but consistently problematic part of American higher education The challenges it poses to traditional academic values have been recognized from the start but they have grown more ominous in recent decades as cable television has become ubiquitous commercial opportunities have proliferated and athletic budgets have ballooned Drawing on new research findings this book takes a fresh look at the role of commercial sports in American universities It shows that rather than being the inconsequential student activity that universities often imply that it is big time sport has become a core function of the universities that engage in it For this reason the book takes this function seriously and presents evidence necessary for a constructive perspective about its value Although big time sport surely creates worrying conflicts in values it also brings with it some surprising positive consequences

The National Collegiate Athletic Association Arthur A. Fleisher, Brian L. Goff, Robert D. Tollison, 1992-06-15 Intercollegiate sports is an enterprise that annually grosses over 1 billion in income Some schools may receive more than 20 million from athletic programs perhaps as much as 10 million simply from the sale of football tickets Drawing on nontechnical economic data the authors present a persuasive case that the premier sports organization of colleges and universities in the United States the NCAA is a cartel its members engaged in classically defined restrictive practices for the sole purpose of jointly maximizing their profits This fresh perspective on the NCAA offers explanations of why illicit payments to athletes persist why non NCAA organizations have not flourished and why members have readily agreed on certain suspect rules Tracing the historical development of this institutional behavior the authors argue that the major football powers in the early 1950s were able to gain control of the internal processes of NCAA enforcement Over time

as other schools teams improved and began to win on the playing field the more powerful institutions applied pressure to bring the newcomers under NCAA investigation and ultimately to place them on probation By carefully managing NCAA enforcement regulations major schools blunted the threat to their continued growth presented by other teams Offering a valuable case study for sports analysts and students of economics and cartel behavior this book is a revealing glimpse inside the embattled NCAA *Broadcasting* ,1982-04 *Cases and Materials on Trade Regulation* Milton Handler,1990 **Radio Advertising Source** ,1998-12 **Ad \$ Summary** ,2001 Advertising expenditure data across multiple forms of media including consumer magazines Sunday magazines newspapers outdoor network television spot television syndicated television cable television network radio and national spot radio Lists brands alphabetically and shows total expenditures media used parent company and PIB classification for each brand Also included in this report are industry class totals and rankings of the top 100 companies in each of the media *Sportometrics* Brian L. Goff,Robert D. Tollison,1990 Once studied by economists primarily to analyze antitrust implications of leagues or labor contracts with players the sports world has now been identified by pathbreaking economists as a model of universal economic behavior These economists have coined the term sportometrics to describe their two way vision of sports as a reflection of the economic world and as a model for further study of economic behavior and principles The essays are thus not merely the economics of sport the profits and losses of various players managers owners and spectators but also explorations into the economic and mathematical relationships between athletes success and their earnings between the structure of high school athletic competition and the players later careers in professional sports and between the length of player contracts and the number of players on the disabled list to name a few The authors see in these relationships the individual and institutional behavior of athletes managers coaches and sports associations and connect them to the broader arena of labor markets commodity cartels crime income distribution individual productivity and other areas Contracts rules and ability are constraints to the economic players and their economic behavior is analyzed in terms of choices made within constraints With these essays economists and industry specialists will be able to better understand both the dynamics of sports as an industry and the economic behavior of institutions and individuals in general **Facts on File** ,1957 *United States of America V.
