dem Entwerfenden eine seltene Konzentration auf die Schaffung von Raum Körper und Form. Weitaus weniger als andere Bauaufgaben wird sakrale Architektur von funktionalen Anforderungen, Normen und Standards bestimmt. Sie kann sich in der Regel als pure Baukunst entfalten. Im Hinblick auf den Entwurf bietet die Bauaufgabe dem Architekten somit immense Freiheiten. Zugleich verlangt aber der besondere atmosphärische Anspruch sakraler Räume von den Architekten einen hochsensiblen Umgang mit Religion sowie mit den jeweiligen kulturellen und baulichen Traditionen. Das Buch stellt in einem systematischen Teil die entwerflichen, technischen und planerischen Grundlagen des Bauens von Kirchen, Synagogen und Moscheen dar. In einem Projektteil werden ca. 70 realisierte Bauten der letzten drei Jahrzehnte dargestellt. Dem Autor gelingt auf der Basis seiner fundierten Kenntnisse und langjährigen Publikationserfahrungen eine wertvolle Analyse der konzeptionellen und formalen Aspekte z.B. Grundriss oder Raumform, Lichteinfall, Materialität, die entscheidend zur sakralen Wirkung von Räumen beitragen. *Editor Xavier Güell*. Xavier Güell, 1999. **Hotel Design** Otto Riewoldt, Jennifer Hudson, 1998. Presenting 50 of the best examples of recent hotel architecture and interiors, this work incorporates a diversity of style and form in designer hotels, luxury hotels, resorts, themed hotels, and the stylish mainstream of international business hotels. **Design & Applied Arts Index**, 1999. **At Spillis Candela and Partners** Raul A. Forty years on from the first moon landing, architecture in Space is entering a new era. Over the last decade, there has been a fundamental shift in the Space industry from short-term pioneering expeditions to long-term planning for colonisation and new ventures such as Space tourism. Architects are now involved in designing the interiors of long-term habitable structures in Space, such as the International Space Station, researching advanced robotic fabrication technologies for building structures on the Moon and Mars, envisioning new space yachts for the super rich, and building new facilities such as the Virgin Galactic Spaceport America in New Mexico, designed by Foster Partners. Meanwhile, the mystique of Space remains as alluring as ever, as high-profile designers and educators such as Greg Lynn are running design studios drawing upon ever more inventive computational design techniques. This issue of AD features the most significant current projects underway and highlights key

areas of research in Space such as energy materials manufacture and robotics It also looks at how this research and investment in new technologies might transfer to terrestrial design and construction Space architects Constance Adams Marc Cohen Ondrej Doule Sandra H uplik Meusburger Scott Howe Brent Sherwood Madhu Thangavelu Andreas Vogler Robert Zubrin Architects Bevk Perovic Arhitekti Dekleva Gregoric Arhitekti Foster Partners Neil Leach Greg Lynn OFIS architects SADAR VUGA *Avery Index to Architectural Periodicals*, 1995 Avery Library, 1997-02 *Logbook* Renzo Piano, 1997 Renzo Piano Genoa 1937 studied architecture at the Polytechnic in Milan Since winning the competition to design the Centre Pompidou in Paris 1971 along with Richard Rogers Piano has become a prominent figure on the international architectural scene with more works constructed outside Italy than in his own country Piano brings a similar approach to both the small and the large scale He has directed projects of very varying sizes small buildings like the travelling IBN Pavilion and the Brancusi Museum and great megastructures like Kansai s International Airport Terminal built on a man made island in the Bay of Tokyo and the remodeling of Berlin s Potsdamer Platz where work is scheduled to be completed in 2002 **Architectural Record** ,2001 *Architectural Publications Index* ,2002 **Transactions** ,1985 **Empathic Space** ,2014-11-19 In recent years questions of space have gained renewed momentum in architecture and urban design as adaptation densification and sustainable regeneration have become an increasing priority While most computing based design tends to emphasise the formal aspects of architecture overlooking space and its users the original computational design approaches first spearheaded in the UK in the 1960s and 1970s tended to be focused on behavioural and occupational patterns Over the last decade a new generation of design research has emerged that has started to implement and validate previous investigations into spatial computation aiming to understand how to design spatial configurations based on user experiences This revives an interest in the experiential that was first explored in the early 20th century by German and Nordic organic architects who invented design methods that correlated cognitive responses of buildings occupants to spatial structure The current revival of human centric design however represents the first design approach that synthesises spatial design and algorithmic techniques with organic design thinking which could also be regarded as a return to the first principles of architectural design Contributors include Paul Coates Christian Derix Olafur Eliasson Lucy Helme Bill Hillier smund Izaki Prarthana Jagannath Dan Montello Juhani Pallasmaa Philip Steadman and Guy Theraulaz Featured Architects Designers Jussi ngeslev Art Com Stan Allen Aedas R D Markus Braach Kaisersrot Hermann Hertzberger Kazuhiro Kojima Cat Pablo Miranda and Rafi Segal **Diccionario Akal de la Arquitectura del siglo XX** Jean-Paul Midant, 2004-02-05 Obra que analiza las biografías de los arquitectos más importantes del siglo XX así como sus obras principales los estudios las revistas etc en más de 220 artículos ilustrados con 2700 fotografías
