Rhythm and Race in Modernist Poetry and Science Michael Golston, 2007-12-21 In the half century between 1890 and 1950 a variety of fields and disciplines from musicology and literary studies to biology psychology genetics and eugenics expressed a profound interest in the subject of rhythm In this book Michael Golston recovers much of the work done in this area and situates it in the society politics and culture of the Modernist period He then filters selected Modernist poems through this archive to demonstrate that innovations in prosody form and subject matter are based on a largely forgotten ideology of rhythm and that beneath Modernist prosody is a science and an accompanying technology In his analysis Golston first examines psychological and physiological experiments that purportedly proved that races responded differently to rhythmic stimuli He then demonstrates how poets like Ezra Pound W B Yeats Mina Loy and William Carlos Williams either absorbed or echoed the information in these studies using it to hone the innovative edge of Modernist

practice and fundamentally alter the way poetry was written Golston performs close readings of canonical texts such as Pound's Cantos Yeats's Lake Isle of Innisfree and William Carlos Williams's Paterson and examines the role the sciences of rhythm played in racist discourses and fascist political thinking in the years leading up to World War II Recovering obscure texts written in France Germany England and America Golston argues that Rhythmics was instrumental in generating an international modern art and should become a major consideration in our reading of reactionary avant garde poetry [Text](#)

Institute for scientific information (Philadelphie, Pa.), 1994 **The Collected Works of W.B. Yeats Volume XIII: A Vision** William Butler Yeats, 2008-04 The Collected Works of W. B. Yeats Volume XIII A Vision is part of a fourteen volume series under the general editorship of eminent Yeats scholar George Bornstein and formerly the late Richard J. Finneran and George Mills Harper One of the strangest works of literary modernism A Vision is Yeats's greatest occult work Edited by Yeats scholars Catherine E. Paul and Margaret Mills Harper the volume presents the system of philosophy psychology history and the life of the soul that Yeats and his wife George n e Hyde Lees received and created by means of mediumistic experiments from 1917 through the early 1920s Yeats obsessively revised the book and the revised 1937 version is much more widely available than its predecessor The original 1925 version of A Vision poetic unpolished masked in fiction and close to the excitement of the automatic writing that the Yeatses believed to be its supernatural origin is presented here in a scholarly edition for the first time The text minimally corrected to retain the sense of the original is extensively annotated with particular attention paid to the relationship between the published book and its complex genetic materials Indispensable to

an understanding of the poet's late work and entrancing on its own merit *A Vision* aims to be all at once a work of theoretical history an esoteric philosophy an aesthetic symbology a psychological schema and a sacred book It is as difficult as it is essential reading for any student of Yeats **The Collected Works of W.B. Yeats: A vision (1925)** William Butler Yeats, 2008 Reading the Illegible Craig Douglas Dworkin, 2003 A poet takes another's text excises this prints over that cancels erases rearranges defaces and generally renders the original unreadable at least in its original terms What twentieth century writers and artists have meant by such appropriations and violations and how the illegible results are to be read is the subject Craig Dworkin takes up in this ambitious work *Reading the Illegible* explores such formal and structural manipulations in a wide range of exemplary cases John Cage's and Jackson MacLow's practices of writing through other texts the intentional cancellations of text by book artist Ken Campbell and conceptual artist Marcel Broodthaers Susan Howe's experiments in typography and cultural transmission visual complexity in Charles Bernstein Stan Brakhage and Rosemarie Waldrop the sedimentary texts of post minimalist artist Robert Rauschenberg and poets Steve McCaffery and Christopher Dewdney the tactics of erasure employed by the poet Ronald Johnson and book artist Tom Phillips In his scrutiny of these works and with reference to a rich variety of contextual materials from popular and scientific texts to visual artworks political and cultural theories and experimental films Dworkin proposes a new way of apprehending the radical formalism of such unreadable texts His method seeks to unveil what Dworkin describes as the politics of the poem what is signified by its form enacted by its structures implicit in the philosophy of language how it positions its reader and other questions relating to the poem as material object In doing so he exposes the mechanics and function of truly radical formalism as a practice that moves beyond aesthetic considerations into the realm of politics and ideology Thus this book asks us to reconsider poetry as a physical act and helps us to see how the range of a text's linguistic and political maneuvers depends to a great extent on the material conditions of reading and writing as well as on the mechanics of reproduction *The American Humanities Index* Stephen H.
