ECRM2008-Proceedings of the 7th European Conference on Research Methods Ann Brown,2008 Feminist Research in Theory and Practice Gayle Letherby,2003-02-16 an extremely welcome addition to the field of feminist research British Journal of Educational Studies This is a clear and accessible exploration of feminist method methodology and epistemology After situating herself and her work Gayle Letherby charts the debates concerned with the epistemological political and practical issues involved in doing feminist research and places the debates within a wider consideration of the status of knowledge The main focus of the book is then the particular and practical issues for feminist researchers It examines how the process of research affects the results of that research and explores the relation between politics and practice in terms of research and knowledge production Throughout the book there is a practical emphasis on specific examples of feminist research in action and as well as summarizing current theoretical debates Gayle Letherby adds to them Feminist Research in Theory and Practice is designed and written as a textbook for students at advanced undergraduate and postgraduate level but will be a valuable resource for any researcher or individual interested in women s studies feminism and in researching in the social sciences

Researching 'Race' and Ethnicity Yasmin Gunaratnam,2003-08-07 Gunaratnam s framework is rich in its examination and synthesis of approaches to the study of race the reward for the reader who does pick up the book is that the author deftly articulates the complicated view of research on race first from the quantitative perspective and then skilfully moves the reader to issues of race in qualitative research Studies in Ethnicity and Nationalism This is a welcome book for those engaged in policy and empirical work with an active research agenda there is a level of theoretical sophistication in the text which is often missing from texts concerned with methods in this area Race Relations Abstracts The particular value of this book to readers lies in the discussion of race ethnicity and research issues within a political and social context The author states her intention to explore some of the theoretical and practical dilemmas of researching race and ethnicity This is without question achieved I recommend it as essential reading for those concerned with increasing their awareness of issues relating to race ethnicity and research practice Nurse Researcher This is a thought provoking and challenging book which demonstrated the fractured and fluid nature of difference and power in the research process Importantly it offers a guide to the ways in which research can be effectively and productively used in challenging the status quo Diversity in Health and Social Care Researching Race and Ethnicity provides an innovative discussion of the methodological epistemological and ethical challenges of doing qualitative research that is informed by questions of race ethnicity and social difference By identifying and challenging categorical thinking and many longstanding assumptions about the meanings of race and ethnicity the author gets to the heart of many of the everyday dilemmas and difficulties that researchers confront in the field but are rarely theorised or openly discussed Yasmin Gunaratnam s insistence that race and ethnicity are a significant part of all qualitative research and are not the specialist concerns of those whose work is explicitly focussed upon race provokes a radical rethinking of current methodological debates How do racial and ethnic categories inform

our approaches to research How does the racialised indentity of the researcher and the research participants affect the research interaction and the knowledge that we produce What are the assumptions that are made about racialised subjectivity and inter subjectivity How can we make sense of accounts in which race and ethnicity are silent or are non manifest How can we work ethically across difference In examining these and other questions the wide ranging discussions in the book are animated by examples drawn from the author s ethnographic research with white and minoritized research participants Through these examples readers will be able to engage with some of the complexities of research relationships power relations and ethical concerns about engagement disconnection and complicity in research The attention that the book gives to the excluded experiences of minoritized researchers will be of particular value to many readers *Researching Race and Ethnicity* is essential reading for students and academics in the social sciences *Encyclopedia of E-Health and Telemedicine* Cruz-Cunha, Maria Manuela, Miranda, Isabel Maria, Martinho, Ricardo, Rijo, Rui, 2016-05-04 Patients and medical professionals alike are slowly growing into the digital advances that are revolutionizing the ways that medical records are maintained in addition to the delivery of healthcare services As technology continues to advance so do the applications of technological innovation within the healthcare sector The *Encyclopedia of E Health and Telemedicine* is an authoritative reference source featuring emerging technological developments and solutions within the field of medicine Emphasizing critical research based articles on digital trends including big data mobile applications electronic records management and data privacy and how these trends are being applied within the healthcare sector this encyclopedia is a critical addition to academic and medical libraries and meets the research needs of healthcare professionals researchers and medical students **Great Ideas in Psychology** Fathali M. have been vigorous debates about the roles played by gender sexuality and sexual orientation in research This collection brings together the debates together set them into their historical and theoretical context and deal with the major criticisms and refutations A particular strength of this collection is that it will available a key sources otherwise scattered and hard to obtain Volume I discusses three sub themes the context in which gender became a matter of concern for researchers the context in which feminist methods were developed and the re discovery of the methodological work of well known women such as Jane Addams and Florence Nightingale Volume II looks at research that has been conducted with explicit awareness of gender Volume III focuses on the pioneering work of innovative scholars who argued for feminist methods in the years after 1950 It then goes on to investigate research that defended and debated the formulations of feminist methods Finally volume IV explicitly relates the themes of Queer Theory Subaltern Theory and Polyvocality themes that evolved with feminist methods to those topics showcased in the other three volumes **Feminism and Territoriality** Susanne Hagemann,2005
