## **Research On The African American Family A Holistic Perspective:**

*Research on the African-American Family* Robert B. Hill, 1993-03-05 Black families in America face special and grave problems Widespread unemployment single parent circumstances adolescent pregnancies substance abuse and violence are only some of the problems posing challenges The authors convinced that the conventional perspective used in the past to analyze black families is deficient propose a holistic approach That perspective takes into account the totality of black family life rather than measuring isolated factors Using black families as the central unit of analysis the authors identify fundamental issues requiring concentrated attention and policy changes Both factors external to the black family and consideration internal to it are studied The former include economic factors racism demographics and governmental policies The latter involve such aspects as black family structure changes in the community and widespread changes in values at the individual level The authors provide practical recommendations for improving the conditions of black families through policy changes and revised priorities

**The Strengths of African American Families** Robert B. Hill, 1999-01-14 Returning to his innovative work of twenty five years ago Robert Hill once more offers an incisive analysis of five key cultural strengths of African American families With compassion and eloquence he argues that these existing strengths provide a solid foundation upon which to develop the kind of public policies and self help initiatives that will truly promote the interests not only of the African American community but of our diverse nation as a whole

**Research on African-American Families** Robert Bernard Hill, 1989

**The End of Black Studies** Clovis E. Semmes, 2016-08-12 Following a history of racial oppression and segregation Black Americans were able to move in greater numbers into previously all or predominantly White colleges and universities However they encountered normative structures that excluded or distorted the Black experience and denied Black perspectives As a result Black studies grew up reconstructing the humanity of a historically oppressed devalued and exploited group Knowledge production in Black studies offers distinct insights into the strength and resiliency of the human spirit and poses exemplary models for enlightened social change This book examines the foundational parameters and historical mission of the field of African American Studies which emerged from a broad based Black intellectual tradition defined by the metaproblem of cultural hegemony Semmes seeks to broaden our thinking about the scope and content of Black studies The End of Black Studies identifies Afrocentric or Black centered approaches to knowledge production that are distinctly different from yet inclusive of a historiographical emphasis on ancient Egypt but alternative to the claim of a singular African worldview This book will appeal to students and scholars interested in the field of Black Studies including African American studies Africana studies Africology and Pan African studies It will be a source of critical discussion for graduate seminars examining theory building and or knowledge production research and writing in Black studies The End of Black Studies has received the 2017 Outstanding Book Award from the National Council for Black Studies Read the Introduction for free online using our eBook widget
