**Corporate Codes of Ethics** Christian Bacher,2006-03-06 Essay from the year 2005 in the subject Business economics Business Ethics Corporate Ethics grade A University of Otago Department of Management course International Management language English abstract As long as human societies exist the life of man has been based on norms rules values and practices that governed human behaviour Individual and communal shared ethics even make life within society possible as we know it Part of this social life is doing business in form of exchanging goods to fulfil basic needs and to achieve higher levels of satisfaction for oneself and for others However to combine moral thinking and acting with today s business activities in a free market economy seems to be counterintuitive Somehow both notions do not really fit together Still Corporate Codes of Ethics exist This essay consist of two parts Each part reflects one question or problem that I found worthy of having more light shed on it The first part answers the question Why do corporate Codes of Ethics exist or Why do corporations establish corporate Codes of Ethics under the basic assumptions that ethics are costly and therefore against the idea of maximising profit which is predominant in the market ideology Proving these assumptions is not so easy First the term ethics will be defined and selected theories which could be the basis for Codes of Ethics will be portrayed Then it is important to know what kind of morality is underlying the modern market ideology as we know it Following that a correlation is sought between the market morality and corporate ethics ending in the insight that corporate morality is costly and therefore is against economic intuition Part one finishes then with a surprisingly simple answer to the question why codes exist The second part brings the findings of the first part in a broader context The considered corporation of part one now grows beyond borders and begins to conduct business globally as a multinational corporation Its existing set of corporate Codes of Ethics are now confronted with other nations societies and cultures and possibly other ethicities Whether

the company should do as the Romans do or not is the major question of the second part closely connected to the keywords relativism and universalism The problems revealed by each approach and possible solutions to them will be shown in part two The conclusion finally summarises the findings of the essay briefly but moreover shows further questions and problems that would be worth to explore in the overlapping areas of applied ethics and international management     The Code of Federal Regulations of the United States of America ,1986 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government     The Current Business Cyclopedia ,1920     **The New Success : Marden's Magazine** ,1921     The Soda Fountain ,1921     *The Legal Environment of Business* Bruce D.
