Comprehensive Textbook of Community Health Nursing Including Environmental Science (Two Volume Set),

First Edition - E-Book Neerja Sood, Sakshi Chaturvedi, 2025-04-07 This book has been written with student nurses learning needs in mind and it fully covers the Indian Nursing Council's new revised syllabus for nursing degree and diploma courses. Although it primarily intends to cater to the curriculum demands of BSc Nursing and GNM students, it will also be extremely valuable for students of various other streams studying community health courses MLHP CCH and MPH courses. The main principles have been conveyed in clear terms from the students' perspective. The global and national health scenario and community health nursing principles are considered while explaining the role of community health nurses. Designed to meet the curricular needs of student nurses, relevant case studies and examples included. Figures, tables, and pictures are placed in order to enhance logical thinking. Recent research work in the relevant field is included in the content. Contains short answer and long answer exam-oriented questions at the end of chapters. Provides additional multiple choice questions to help students have a firm grasp on the subject.

The Miracle Kit Behind the Power of Prayer Nehemiah Davis, 2023-10-17 This book *The Miracle Kit behind the Power of Prayer* offers an analysis of a mystic ancient form of prayer that manipulates subtle cosmic energies through ancient techniques of yoga science and religious rituals that are not understood in today's materialistic modern science. The mystic prayer technique that this book is advocating uses the spoken word along with positive imagination and visualization to invoke and harness this power of cosmic energies or pranas. This book goes into detail on the ancient science for manipulating the five major pranas that flow through our subtle bodies and gross physical body. The technique also uses pranayama techniques, an ancient method of breath control that allows man to control the flow of prana that enters and exits the body's psychic centers, Chakras. The prayer technique also incorporates mudra yoga that assists the prayer practitioner in sealing and redirecting pranas so that they can be impregnated with a mind substance that has the purpose and direction of the intended target.

Franciscan nuns at the peak of religious feelings show a functional change in the lobes of their brain. Similar processes have been found in people with epilepsy which Hippocrates called the sacred disease. New research is showing that not only does a person's brain activity change in particular areas while that person is experiencing religion epiphany but that such events can be created for some people even self-professed atheists by stimulating various parts of the brain. It is not the goal of neurotheology to prove or disprove the existence of God but to understand the biology of spiritual experiences. Such experiences seem to exist outside of time and space caused by the brain losing its perception of a boundary between physical body and outside world. Understanding why this is the case could help explain other intangible events such as altered states of consciousness, possession, supposed alien visitations, near-death experiences, and out-of-body events. Understanding how and why these abilities evolved in the brain could also help us understand how religion contributes to the survival of the human race.
