Tips To Follow The 30-Day Walking Plan

1. Slow is a stroll - approx 25 minutes/mile. Use this easy pace to warm up.
2. Moderate is a normal walking pace - 20 minutes/mile. You can still talk as you walk.
3. Fast is walking at a brisk pace where you're pushing yourself - 17 minutes/mile.
4. Complete sessions in one go or split into 2
5. Repeat a week if you find it too hard.
6. If the plan is too easy increase the intensity of your walks with intervals or hills.

Deep Learning Quick Reference Michael Bernico, 2018-03-09 Dive deeper into neural networks and get your models trained optimized with this quick reference guide

Key Features A quick reference to all important deep learning concepts and their implementations Essential tips tricks and hacks to train a variety of deep learning models such as CNNs RNNs LSTMs and more Supplemented with essential mathematics and theory every chapter provides best practices and safe choices for training and fine tuning your models in Keras and Tensorflow

Book Description Deep learning has become an essential necessity to enter the world of artificial intelligence With this book deep learning techniques will become more accessible practical and relevant to practicing data scientists It moves deep learning from academia to the real world through practical examples You will learn how Tensor Board is used to monitor the training of deep neural networks and solve binary classification problems using deep learning Readers will then learn to optimize hyperparameters in their deep learning models The book then takes the readers through the practical implementation of training CNN s RNN s and LSTM s with word embeddings and seq2seq models from scratch Later the book explores advanced topics such as Deep Q Network to solve an autonomous agent problem and how to use two adversarial networks to generate artificial images that appear real For implementation purposes we look at popular Python based deep learning frameworks such as Keras and Tensorflow Each chapter provides best practices and safe choices to help readers make the right decision while training deep neural networks By the end of this book you will be able to solve real world problems quickly with deep neural networks What you will learn

- Solve regression and classification challenges with TensorFlow and Keras
- Learn to use Tensor Board for monitoring neural networks and its training
- Optimize hyperparameters and safe choices best practices
- Build CNN s RNN s and LSTM s and using word embedding from scratch
- Build and train seq2seq models for machine translation and chat applications
- Understanding Deep Q networks and how to use one to solve an autonomous agent problem
- Explore Deep Q Network and address autonomous agent challenges

Who this book is for If you are a Data Scientist or a Machine Learning expert then this book is a very useful read in training your advanced machine learning and deep learning models You can also refer this book if you are stuck in between the neural network modeling and need immediate assistance in getting accomplishing the task smoothly Some prior knowledge of Python and tight hold on the basics of machine learning is required

Pandemonium Mike Lauterborn, 2020-07-15 There was no imagining what the state of the world would become when the news of the first cluster of infections was announced in late 2019 Those seeds would grow into a massively devastating global pandemic caused by Covid 19 It would have implications at every single level in society And from his beachside home in Fairfield CT just 40 miles northeast of New York City the epicenter of the disaster and as the editor of a local online news service Mike Lauterborn was in a position to capture it all The international and national impacts The effect on people and commerce at the local level The shift in lifestyle attitudes mental condition and future outlook that the pandemic caused The humor the
