Kabir Hassan, Mustafa Raza Rabbani, Mamunur Rashid, 2022-11-30 This book explores several challenges facing FinTech in Islamic financial institutions Firstly large banks and financial institutions in countries with updated and innovative technological channels will earn the technology arbitrage from FinTech This size puzzle may create a challenge for Islamic financial institutions that are of smaller size and from technologically less developed countries Secondly while access to FinTech is getting broader day by day usage of FinTech is still limited due to personal and governance related limitations Moreover the level of awareness of the emerging FinTech services i e bitcoin blockchain etc remains extremely poor even among the residents of technologically advanced countries Thirdly use of FinTech by Islamic financial institutions is limited to Islamic banking to users from developed countries among young customers and for a limited number of traditional banking services such as the deposits and payment services Also banks hope to use FinTech to increase the size of a new breed of technology savvy depositors and loan customers to achieve economies of scale which may help stabilize the banking sector Automation in Islamic banks and the participation of Islamic financial institutions in blockchain and bitcoin domains require extensive research from Shariah compliance as well as market and consumer related grounds With all the opportunities and challenges of FinTech promoting inclusion easier loan monitoring and risk of Shariah non compliance this book explores the implications for Islamic financial institutions and will be of interest to scholars researchers and students of Islamic finance and financial technology **TV Guide** ,1994 *Software News* ,1985 Mobile Payment and Customer Behavior. Where does Germany stand? Adrian Demuth, 2023-06-06 Essay from the year 2020 in the subject Business economics Investment and Finance grade 1 University of Applied Sciences Ludwigshafen course Finance und Economics language English abstract Mobile Payment represents a

global trend of the future which is already commonplace in some countries This trend needs to be examined and analysed more closely Which effects does Mobile Payment have on the consumer and which problems might be the reason for the different acceptance and spread of Mobile Payment These questions are discussed in more detail in the following paper which deals with the topic of Mobile Payment and consumer behaviour Taking photos or videos checking for news chatting with friends while watching videos The role and the impact of smartphones and its mobile apps has changed more and more over the last years For most people it has become an indispensable tool While going out for shopping of groceries or clothes people nowadays just carry their most important things with them These are often their keys wallets and smartphones But the number of these things could decrease further in the next few years due to the technological developments of the smartphone For example unlocking smart locks via Bluetooth enabled smartphones or regarding the elimination of the wallet the development of Mobile Payment systems The Smartphone is the central medium of the future which will have to bridge the gap between easy usability and secure and fast processes Especially concerning Mobile Payment which represents a new way of paying via smartphone New providers are offering payment methods and a changed purchasing behaviour of end customers increasingly determines the product landscape and the market shares of these payment systems Interestingly however Mobile Payment is a very controversial topic The controversy can already be seen here if one briefly looks at the global spread and acceptance of Mobile Payment While in Germany currently only about 25% of all people are users of Mobile Payment 71% of all people in Chinese use Mobile Payment systems
