Generative AI Tools Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years, applications of generative artificial intelligence (GAI) have found rapidly growing use in medicine, science, and daily life. Large language models (LLMs) opened up new avenues, in particular for education. LLMs have been used to create interactive educational content for students, stimulate their curiosity, generate code explanations, and develop assessment questions. Additionally, LLMs have been applied for language practice, anxiety alleviation, and feedback provision. In higher education, LLMs have shown potential for assisting in medical exam preparation and clinical decision-making. In school education, LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback. More recently, LLM-based applications such as ChatGPT have been used to generate teaching materials or assessment tasks across different subjects. The field's understanding of the effects of the use of LLM-based applications in classroom teaching, however, is still in its infancy. GAI tools may help solving a range of tasks in education, in particular with respect to teachers and students, and teachers' efforts to generate content. However, it is critical that teachers and students do not overly rely on GAI-generated solutions but instead critically assess each solution. Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies. *Digitales Controlling* Ulrich

um eine ideale Grundlage für den weiteren Forschungsinhalt zu schaffen. Der Forschungsmethodik liegt ein qualitatives Forschungsdesign zugrunde. Im Rahmen von neun halb strukturierten Interviews mit Führungskräftlichen Beratern/Coaches wird eine Brücke zwischen Theorie und der angewandten Praxis geschaffen. Im Ergebnisteil der Arbeit wird das richtungsweisende Framework, welches Führungskräfte unterstützen soll, dargestellt. Die inhaltlichen Ziele zeigen, dass es eine breite Vielfalt relevanter Schlüsselkompetenzen gibt. Neben analogen Fähigkeiten, die weiterhin eine wichtige Rolle spielen, wird das technische Verständnis und das Bewusstsein für Nachhaltigkeit wichtiger. Ein Entscheidungsstrategier sollte sich dennoch immer auf das Herzstück der Führung konzentrieren: der sozialen Interaktion. Der größte Effekt wird erzielt, wenn eine Weiterentwicklung von innen nach außen stattfindet. Die Masterarbeit richtet sich an alle Interessenten, die mit den Themenbereichen regelmäßig in Kontakt stehen, diese ansprechend finden oder die Dimensionen verstehen möchten.

The Implications of new Technology, particularly Artificial intelligence (AI) for International Politics

Malam Wasai, 2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda, challenging geostrategic relations, serving as a tool for diplomats and negotiators, and creating new opportunities and concerns about protecting human rights. Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis: individual, state, and international. State level analysis examines the foreign policy behavior of states in terms of state characteristics. For example, some scholars say that all democracies behave a certain way; they don't fight with other democracies. Artificial intelligence impact governance. As AI continues to evolve and permeate various aspects of our lives, its implications for AI and how it impacts businesses. AI artificial intelligence refers to machines that can perceive, synthesize, and infer information. It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then use the information they collect to improve themselves. Based AI is designed to significantly enhance human capabilities and contributions, making it a valuable business asset.
