Data Profiling and Insurance Law Brendan McGurk KC, 2019-03-21 The winner of the 2020 British Insurance Law Association Book Prize this timely expertly written

book looks at the legal impact that the use of Big Data will have on the provision and substantive law of insurance Insurance companies are set to become some of the biggest consumers of big data which will enable them to profile prospective individual insureds at an increasingly granular level More particularly the book explores how i insurers gain access to information relevant to assessing risk and or the pricing of premiums ii the impact which that increased information will have on substantive insurance law and in particular duties of good faith disclosure and fair presentation of risk and iii the impact that insurers new knowledge may have on individual and group access to insurance This raises several consequential legal questions i To what extent is the use of big data analytics to profile risk compatible at least in the EU with the General Data Protection Regulation ii Does insurers ability to parse vast quantities of individual data about insureds invert the information asymmetry that has historically existed between insured and insurer such as to breathe life into insurers duty of good faith disclosure And iii by what means might legal challenges be brought against insurers both in relation to the use of big data and the consequences it may have on access to cover Written by a leading expert in the field this book will both stimulate further debate and operate as a reference text for academics and practitioners who are faced with emerging legal problems arising from the increasing opportunities that big data offers to the insurance industry *Talk to Me* James

Vlahos, 2019-03-28 The gripping inside story of the race to build conversationally capable computers Chat with the author ask your Alexa device to open the voice computing book _____ The next great technological disruption is coming The titans of Silicon Valley are racing to build the last best computer that the world will ever need They know that whoever successfully creates it will revolutionise our relationship with technology and make billions of dollars in the process They call it conversational AI Computers that can speak and think like humans do may seem like the stuff of science fiction but they are rapidly moving towards reality In *Talk to Me* veteran tech journalist James Vlahos meets the researchers at Google Amazon and Apple who are leading the way to a voice computing revolution He explores how voice tech will transform every sector of society handing untold new powers to businesses upending traditional notions of privacy revolutionising access to information and fundamentally altering the way we understand human consciousness And he even tries to understand the significance of the revolution firsthand by building a chatbot version of his terminally ill father Vlahos s research leads him to one fundamental question What happens when our computers become as articulate compassionate and creative as we are

_____ Brilliant and essential You ll find insights and meaning on every page and you ll keep turning them This book is dynamite NICHOLAS THOMPSON editor in chief of *Wired* Conversational AI is a genuine paradigm shift in our experience with technology Vlahos brings the whole story to life A thoughtful and enjoyable read TOM GRUBER co creator of Siri The baton of disruption has been passed from the smart phone to voice and Vlahos helps make sense of this tectonic shift SCOTT GALLOWAY author of *The Four* Voice computing is revolutionising the way we interact with our devices *Talk to Me* offers a road map showing how we got to this point and the opportunities and risks that lie ahead MARTIN FORD author of
