Renegotiating The Welfare State:

Renegotiating the Welfare State Gerhard Lehmbruch, Frans van Waarden, 2004-02-24 Why have some countries have been more successful in welfare state reform than others This book examines the experiences of various countries in reforming their welfare states through renegotiations between the state and peak associations of employers and employees This corporatist concertation has been blamed for bringing about all the ills of the welfare state but lately corporate institutions have learned from their bad performances modified their structures and style of operation and assumed responsibility for welfare state reform Consensual bargaining is back on the agenda of both policy makers and of social science This topical volume with its internationally respected panel of contributors will appeal to all those interested in the welfare state and labour relations It includes chapters focusing on the Netherlands Austria Sweden Denmark Germany Switzerland and Ireland as well as a section looking at the role of corporatist concertation in the European Union

European Welfare States and Globalization Ali Hajighasemi, 2019 This timely book assesses how Europe's welfare states have dealt with the challenges of globalisation and the financial crisis It asks whether the European Union has adopted a general strategy for dealing with four major threats to the sustainable development of European societies the employability of a growing number of redundant workers an aging population low birth rates and the persistent problem of gender inequality The book will be an important read for social policy scholars particularly those focusing on European welfare states how they differ and lessons to be learnt from them It also highlights key lessons from a broad range of case studies to help policymakers in understanding how and where improvements may be made in the future **Social Citizenship in an Age of Welfare Regionalism** Mark Simpson, 2022-06-30 This book presents a socio legal examination of national and devolved level developments in social protection in the UK through the eyes of politicians and officials at the heart of this process Since its inception in 1998 devolution has altered the character of the UK welfare state with dramatic change in the

10 years since 2010 A decade of austerity at national level has exposed diverging view in how governments in London Edinburgh and Belfast view the social rights of citizenship This political divide has implications for both social security law as the devolved countries begin to flex their muscles in this key area for citizens economic welfare and the constitutional settlement The book reflects on the impact of austerity the referendum on Scottish independence and subsequent changes to the devolution settlement Northern Ireland's hesitant moves away from parity with Westminster in social protection withdrawal from the European Union Brexit and the possible retreat from austerity during the COVID 19 pandemic The social union may or may not be weakening its character is unquestionably changing and the book lays bare the ideological and pragmatic considerations driving legal developments TH Marshall's theory of citizenship provides the lens through which these processes are viewed while itself being reinterpreted in light of the national government's increasing delegation of responsibility for social rights whether to individuals the voluntary sector or lower tiers of government

Targeting Social Benefits Neil Gilbert, 2017-07-12 Over the last decade changing family life and increasing fiscal constraints on welfare expenditures have forced industrialized nations to reconsider how they approach social protection Faced with fiscal and demographic changes many countries have been struggling to develop innovative policy responses Some involve targeting benefits in order to shrink existing program commitments to focus welfare expenditures on those most in need and to give social welfare systems more flexibility in redirecting available resources to meet emerging demands Targeting Social Benefits International Perspectives and Trends provides a systematic assessment of the trend toward targeting in seven countries representing a range of industrialized welfare states New Zealand the Netherlands Britain Israel the United States Italy and Sweden The contributors to this volume examine the extent to which each country has adopted measures to focus social benefits on specific population groups and particularly social welfare program areas A summary chapter surveys and categorizes the choices nations have made in targeting methods culls the lessons learned for recent reforms and explores the implications of these developments for the future of the welfare state Specific methods for targeting benefits in different program areas are analyzed which includes means tests income testing diagnostic criteria behavioral requirements and the use of socio demographic categories This illuminating volume provides an in depth understanding of alternative approaches to and consequences of policies designed to target social benefits It will help scholars professionals and policymakers deepen their understanding of the alternative methods and consequences of recent policies designed to shift the allocation of social welfare benefits Neil Gilbert is Chernin Professor of Social Welfare at the School of Social Welfare University of California at Berkeley and Director of the Center for Com

Renegotiating Equalization Thomas J. Courchene, 1998 This commentary

develops a set of general design and implementation principles that will allow some progress toward reforming fiscal federalism for the next century while incorporating sufficient flexibility to accommodate alternative paths for the broader evolution of Canada's economy and society. The first part focuses on a set of initial conditions that will inform the development of transfer principles. Also included here is an assessment of where Canada currently stands with respect to key intergovernmental transfer programs. The rest of the commentary is devoted to isolating transfer design and implementation principles with major focus on the equalization program. The second part offers two principles or rationales for equalization: a federal rationale and a citizenship rationale. This is followed by a brief review of the history of the equalization formula and how this evolution accords with those two principles. The third part attempts to debunk several key assumptions of the unitary state/closed economy model found in the prevailing equalization literature. The fourth part develops a set of implementation principles and indicates a series of design faults with respect to the status quo. Issues addressed include the appropriate equalization standard, fiscal neutrality, expenditure needs, the resource rent challenge, and the erosion of the stabilization component of transfers.

The University and the State Marek Kwiek, 2006. This book argues that the current renegotiation of the postwar social contract concerning the welfare state in Europe is being accompanied by the renegotiation of a smaller scale modern social pact between the university and the nation state. Current transformations to the state under the pressures of globalization will not leave the university unaffected and consequently it is useful to discuss the university and its future in the context of the state. In the new global order, against the odds, universities are striving to maintain their pivotal role in society. Their role as engines of economic growth and contributors to economic competitiveness between increasingly knowledge-driven economies is being widely acknowledged. But it is a radical reformulation of their traditional social roles. The main reasons for current transformations of the university include globalization pressures on nation states and their public services, the end of the Golden Age of the Keynesian welfare state, and the emergence of knowledge-based societies and knowledge-driven economies. Therefore, the university can no longer be discussed solely in traditional, relatively self-contained disciplinary contexts. Here, the university is seen from a variety of perspectives and through the lens of a wide range of disciplines: mainly educational sciences, political economy, sociology, political sciences, and philosophy.
