## Reorienting Economics:

Reorienting Economics Tony Lawson, 2012-08-21 Contemporary economics is characterized by a mismatch between its methods of analysis and the nature of the world it seeks to interpret. Despite regular economic crises and ongoing critique of the discipline, the drift from political economy into applied mathematics appears to continue unabated. In this book, Tony Lawson advocates a realignment of economics with social reality. In analyzing mainstream economists' misplaced universality, the author places ontology at the heart of a reoriented future in which economics is integrated within the wider human and social sciences.

Ontology and Economics Edward Fullbrook, 2008-10-27 This original book brings together some of the world's leading critics of economics orthodoxy to debate Lawson's contribution to the economics literature. In this collection, scholars such as Bruce Caldwell, John Davis, and Geoffrey Hodgson present their thoughtful criticisms of Lawson's work, while Lawson himself presents his reactions.

**Handbook of Research Methods and Applications in Heterodox Economics** The Late Frederic S. Lee, Bruce Cronin, 2016-04-29 Despite the important methodological critiques of the mainstream offered by heterodox economics, the dominant research method taught in heterodox programmes remains econometrics. This compelling Handbook provides a comprehensive introduction to a range of alternative research methods invaluable for analysing the data prominent in heterodox studies. Providing a solid basis for a mixed methods approach to economic investigations, the expertly crafted contributions are split into three distinct sections: philosophical foundation and research strategy, research methods and data collection, and applications. Introductions to a host of invaluable methods such as survey, historical, ethnographic, experimental, and mixed approaches, together with factor, cluster, complex, and social network analytics, are complemented by descriptions of applications in practice. Practical and expansive, this Handbook is highly pertinent for students and scholars of economics, particularly those dedicated to heterodox approaches, as it provides a solid reference for mixed methods not available in mainstream economics research methods courses.

, 1999 **ReORIENT** Andre Gunder Frank, 1998-07-31 Andre Gunder Frank asks us to ReOrient our views away from Eurocentrism to see the rise of the West as a mere blip in what was and is again becoming an Asia-centered world. In a bold challenge to received historiography and social theory, he turns on its head the world according to Marx, Weber, and other theorists, including Polanyi, Rostow, Braudel, and Wallerstein. Frank explains the Rise of the West in world economic and demographic terms that relate it in a single historical sweep to the decline of the East around 1800. European states, he says, used the silver extracted from the American colonies to buy entry into an expanding Asian market that already flourished in the global economy. Resorting to import substitution and export promotion in the world market, they became Newly Industrializing Economies and tipped the global economic balance to the West. That is precisely what East Asia is doing today. Frank points out to recover its traditional dominance. As a result, the center of the world economy is once again moving to the

Middle Kingdom of China Anyone interested in Asia in world systems and world economic and social history in international relations and in comparative area studies will have to take into account Frank's exciting reassessment of our global economic past and future
