Repairing The American Metropolis Common Place Revisited:

Repairing the American Metropolis Doug Kelbaugh, 2002 *Repairing the American Metropolis* is based on Douglas Kelbaugh's *Common Place Toward Neighborhood and Regional Design* first published in 1997. It is more timely and significant than ever with new text, charts and images on architecture sprawl and New Urbanism, a movement that he helped pioneer. Theory and policies have been revised, refined, updated and developed as compelling ways to plan and design the built environment. This is an indispensable book for architects, urban designers and planners, landscape architects, architecture and urban planning students and scholars, government officials, developers, environmentalists and citizens interested in understanding and shaping the American metropolis. Das Flächensparbuch Anja Besecke, 2005

Managing the Magic of Old Places Jeremy Wells, 2025-10-14 From 1849 to the early 1980s the development of US historic preservation policy was shaped by fewer than one hundred elite White men from Europe and America. This orthodox preservation doctrine has too long silenced the vibrant experiential relationships between everyday people and their heritage. *Managing the Magic of Old Places: Crafting Public Policies for People-Centered Historic Preservation* offers a radical rethinking of how historic preservation is approached in the United States. Author Jeremy C. Wells argues for a revolutionary shift in federal preservation policy, one that embraces community-based participatory practice and draws from environmental psychology to tap into the intangible emotional connections people have with old places. Wells highlights the experiential values that laypeople often ascribe to historic environments, which are frequently dismissed by expert-driven policies. He contends that if historic preservation policy continues to ignore these aspects, the field will lose relevance as the gap between professionals and the public widens. Drawing from interdisciplinary research in the social sciences, particularly phenomenology and environmental psychology, Wells's vision of public preservation policy centers the lived experiences of communities, reinvigorating the field and ensuring that the preservation of historic places resonates with a wider, more inclusive audience. Wells positions his work within the growing field of critical heritage studies, yet his focus on the psychological and emotional aspects of preservation distinguishes it as a unique contribution. By placing the needs and experiences of the public at the heart of preservation efforts, Wells critiques the historical foundations of US preservation policy while offering a bold agenda for reform. *Public Places: Urban Spaces* Matthew Carmona, 2021-02-15 *Public Places: Urban Spaces* provides a comprehensive overview of the principles, theory and practices of urban design for those new to the subject and for those requiring a clear and systematic guide. In this new edition, the book has been extensively revised and restructured. Carmona advances the idea of urban design as a continuous process of shaping places, fashioned in turn by shifting global, local and power contexts. At the heart of the book are eight key dimensions of urban design theory and practice: temporal, perceptual, morphological, visual, social, functional and two new process dimensions: design governance and place production. This extensively updated and revised third edition is more international in its scope and coverage.

incorporating new thinking on technological impact climate change adaptation strategies for urban decline cultural and social diversity place value healthy cities and more all illustrated with nearly 1 000 carefully chosen images *Public Places Urban Spaces* is a classic urban design text and everyone in the field should own a copy *Sprawling Places* David Kolb, 2010-01-25 People often bemoan the spread of malls suburban strips subdivisions and other sprawling places in contemporary America But are these places as bad as critics claim In *Sprawling Places* David Kolb questions widely held assumptions about our built environments Kolb agrees there is a lot not to like about many contemporary places but to write them off simply as commodified nonplaces does not treat them critically Too often Kolb says aesthetic character and urban authenticity are the focus of critics when it is more important to understand a place's complexity and connectedness Kolb acknowledges that the places around us increasingly have banal exteriors yet they can be complex and can encourage their inhabitants to use them in multiple nonlinear ways Ultimately Kolb believes human activity within a place is what defines it Even our most idealized classical places he shows change over the course of history when subjected to new linkages and different flows of activity Engaging with the work of such writers and critics as Henri Lefebvre Manuel Castells Karsten Harries and Christian Norberg Schulz Kolb seeks to move discussions about sprawl away from the idea that we must choose between being rooted in the local Black Forest soil or wandering in directionless space By increasing our awareness of complexity and other issues Kolb hopes to broaden and deepen people's thinking about the contemporary built environment and to encourage better designs in the future *The Urban Design Reader* Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of *The Urban Design Reader* draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of *The Urban Design Reader* this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several

new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field *Portico* ,2000
