Convincing Political Stakeholders

Klemens Joos, 2016-12-19 With the Treaty of Lisbon which entered into force on 1 December 2009 the EU de facto became a state territory stretching from Portugal to Finland and from Ireland to Cyprus

The previous co decision procedure was elevated to become the standard procedure ordinary legislative procedure

For the players on the European Union stage the EU member states EU regions companies associations and organisations this leads to the problem that the outcome of decision making processes has become largely incalculable

The author Klemens Joos points out that at the latest since the Treaty of Lisbon successful lobbying in the complex decision making system of the EU is much more the result of the intermesh of content competence the four classic instruments of lobbying corporate representative of firms associations public affairs agencies law firms with process structure competence i.e. the EU wide maintenance of the required spatial personnel and organisational capacities as well as strong networks across institutions political groups and member states on the part of an independent intermediary

One's own concerns are only likely to be successful if the interests of politicians and the general public are taken into consideration

change in perspective to the common interest perspective

If this perspective change is successful process support competence is crucial to achieving the objective

Are the Council of Ministers and the Commission partners or rivals in European policy-making?

Julia Heise, 2005-04-02 Essay from the year 2004 in the subject Politics Topic European Union grade 1.5

University of Edinburgh language English abstract The European Union EU is a hybrid and unique body which does not fit with many of our preconceived notions of how politics is organized

Cini 2003 a.1 Two aspects contribute to its distinctiveness

First the EU has a two level nature it combines supranational with intergovernmental features

Supranationalism is defined as the existence of an authority that is higher than that of the nation state and capable of imposing its will upon it

Heywood 2000 259 Applied to the EU this definition would only concern the supranational EU institutions

But supranationalism also refers to the common interests of the Union as a whole and to most policy areas which are under the authority of the EU

The intergovernmental EU level is characterised by the dominance of state sovereignty

It relates to some EU policy areas and particularly to the special role of the 25 EU member states which have considerable influence within the Union

Both EU levels have been subject to two different EU integration theories

Neo functionalism

explains the creation and importance of a supranational stage with its core concept of spillover Intergovernmentalism is characterized by its state centrism and focus on sovereignty The second unique aspect of the EU related to the first is the complex EU policy making process Legislation developed by the EU institutions has to be implemented on a national level Particularly the European Commission and the Council of the EU are main actors in policy making In this process the Commission explicitly represents the Union s interests and is thus referred to as supranational The Council shows strong intergovernmental characteristics It acts on behalf of the sovereign EU member states and therefore has considerable influence in policy making The European Yearbook of Comparative Government and Public Administration ,1996

European Journal of East Asian Studies ,2006 Democracy, Legitimacy and the European Union Christer Karlsson,2001 This study provides a comprehensive analysis of the democratic status of the EU political system and the Union s alleged legitimacy crisis It also examines six different positions on how to address the EU s democratic deficit Three of these defend the status quo while the others are calling for democratisation By examining the strengths and weaknesses of these positions this book contributes to our understanding of whether it is possible and desirable to democratise the European Union **Law, Legitimacy, and European Governance** Stijn Smismans,2004 This volume examines the role of law in increasing the legitimacy of European decision making by structuring and facilitating diverse forms of participation representation and deliberation whilst ensuring transparency and accountability The democratic deficit and the legitimacy of the European Union have attracted the attention of both lawyers and political scientists but few have examined normatively the role of interest groups or of functional participation in European governance This book examines institutional settings such as committees agencies and social dialogue within which such participation occurs Moving beyond generalities the author provides a detailed empirical account of participation within one policy sector EC occupational health and safety Smismans argues that different institutional settings for functional participation are underpinned by very different considerations they weight balanced representation deliberation and expertise differently He shows how this participation differs between legislation and regulatory implementation and appraises the extent to which participation can compensate for a lack of territorial representation in implementation procedures and can exert some control over scientific experts This book reveals changes in functional participation over time from regulatory to persuasive policy making and argues that the new forms of governance are not necessarily more participatory than the old The Encyclopædia Britannica James Louis Garvin,1926 **Asylum and Migration Policies in the European Union** Steffen Angenendt (dr),1999 The Netherlands Jeroen Doomernik
