Reproductive Failure:

Comparative Aspects of Reproductive Failure K. Benirschke, 2012-12-06 To many the contents of this conference may not seem appropriate at a time when the minds are preoccupied with a population explosion To the participants and guests of this conference however this was a week of fascinating discussions While quantitative aspects of reproduction were touched upon it was mostly a search for an understanding of the qualitative aspects of reproduction and its failure Only when we understand these more completely will it be possible to render optimum care and have the foundations for meaningful population control The conference was conceived in discussions at the Committee on Pathology of the National Academy of Sciences Washington in 1965 It was felt that investigators in medicine and the veterinary fields would profit greatly from a closer liaison All too frequently we work relatively isolated in our respective fields and with the burgeoning information filling our journals we have not enough time and leisure to stand back and attempt a comparative look at the subject of study Often we are not familiar with the techniques other disciplines use and which we could well employ to great advantage while this applies to many aspects of medicine a comparative approach to the study of reproductive failure seemed most advantageous at this time

Environmental Contaminants in Wildlife James P. Meador, 1996-03-20 Many books have been written about the effects of toxic chemicals on wildlife but none has focused on the practical question How much of a chemical in the tissues of an animal is harmful This book deals exclusively with that question This comprehensive reference will certainly become the standard resource on the topic offering authoritative and sound advice on many environmental contaminants With chapters written by outstanding experts in their respective fields this is not only a scholarly collection of discussions on different chemicals but for those who have the day to day task of evaluating the harm of environmental contaminants to wildlife this book will provide answers on for example how to interpret 1 ppm lead in the liver of a duck or fish The authors explain the snags of interpreting data that are sometimes conflicting or insufficient providing the reader with helpful advice on how to cope with such data Each chapter reviews literature on a specific chemical followed by a easy to understand summary providing technical guidance For many years this book will remain the preeminent reference on how to interpret contaminant levels of organochlorine pesticides PCBs dioxins PAHs metals selenium and fluorides in wildlife

Immune Involvement in Recurrent Pregnancy Loss Gendie Lash, Raj Raghupathy, 2023-11-27 Recurrent pregnancy loss RPL is defined as two or more consecutive pregnancy losses before the 20th week of gestation occurring in 1% 3% of reproductive women Unexplained RPL URPL is a heterogeneous condition affecting approximately 50% of RPL cases with one contributing factor thought to be a disruption in maternal immune tolerance Various immune effectors and molecules in the immune microenvironment establish specific maternal tolerance toward the semi allogeneic fetus during pregnancy Immune cells including innate lymphoid cells ILCs myeloid cells T cells and B cells have been found to contribute to maintaining this maternal immunological tolerance during pregnancy ILCs have been found to be the most abundant immune

cells in the pregnant uterus with many studies focusing on the relationship between RPL and either T cells or natural killer NK cells in peripheral blood and the endometrium decidua Despite progress in uncovering the roles of NK and regulatory T cells and cytokines in pregnancy the immune heterogeneity in patients with URPL remains elusive **Selenium**

Assessment in Aquatic Ecosystems A. Dennis Lemly, 2002-03-21 Selenium is a naturally occurring trace element that can become concentrated and released by industrial agricultural petrochemical and mining activities At concentrated levels it is toxic and has polluted ecosystems around the world This book will serve as a comprehensive practical handbook for everyone dealing with selenium in aquatic environments It offers field tested approaches and methods for assessment and water quality management Using his twenty year experience the author discusses the effects of selenium on fish and bird populations and presents guidelines for identifying sources of pollution interpreting selenium concentrations assessing hazardous conditions setting water quality criteria and ecosystem loading limits TMDLs He also includes a procedure for setting environmentally safe limits that ensure compliance with EPA regulations Selenium Assessment in Aquatic Ecosystems will interest field scientists natural resource managers risk assessors and environmental planners **Reproduction: Part A**

Peter K.T. Pang, 1991-02-28 Vertebrate Endocrinology Fundamentals and Biomedical Implications Volume 4 Part A Reproduction provides information pertinent to the structure and function of the vertebrate reproductive endocrinology This book deals with a variety of subjects including oocyte maturation gestation ovulation vitellogenesis spermatogenesis and the maturation and aging of the reproductive system Organized into seven chapters this volume starts with an overview of the reproductive mechanisms and their underlying bases with focus on the similarities between species This book then discusses the factors of reproductive failure in many species including failure of ovulation abnormal fertilization failure of fertilization and failure of implantation Other chapters explore the cellular endocrinological and molecular mechanisms that regulate oocyte maturation in mammals which is directly stimulated by the need to improve human fertility and fecundity in domestic mammals The final chapter deals with the aging of the brain pituitary gonadal axis in vertebrates Reproductive endocrinologists and developmental neuroendocrinologists will find this book extremely useful *Current Therapy in Large Animal Theriogenology* Robert S.
