## **Reproductive Technologies:**

*Reproductive Technologies* Thomas A. Shannon, 2003-12-17 Over a decade ago the field of bioethics was established in response to the increased control over the design of living organisms afforded by both medical genetics and biotechnology. Since its introduction, bioethics has become established as an academic discipline with journals and professional societies, is covered regularly in the media, and affects people everyday around the globe. In response to the increasing need for information about medical genetics and biotechnology as well as the ethical issues these fields raise, Sheed Ward proudly presents the Readings in Bioethics Series. Edited by Thomas A. Shannon, the series provides anthologies of critical essays and reflections by leading ethicists in four pivotal areas: reproductive technologies, genetic technologies, death and dying, and health care policy. The goal of this series is twofold: first, to provide a set of readers on thematic topics for introductory or survey courses in bioethics or for courses with a particular theme or time limitation; second, each of the readers in this series is designed to help students focus more thoroughly and effectively on specific topics that flesh out the ethical issues at the core of bioethics. The series is also highly accessible to general readers interested in bioethics. This volume collects critical essays by leading scholars on reproductive technologies, abortion, in vitro fertilization, prenatal diagnosis, and cloning. Included in this volume are David Adamson, James P. Toner, Thomas A. Shannon, Bonnie Steinbock, Laura A. Schieve, Richard J. Paulson, G. Pennings, Thomas H. Murray, Lori B. Andrews, J. M. Phillips. *Advances in Assisted Reproductive Technologies* Nayana H. Patel, Sandro C. Esteves, 2019-08-25 This book reviews important advances that have made the field of assisted reproduction a dynamic subspecialty and provides insight into other exciting areas of research that will continue to revolutionize the field in the future. Assisted reproductive technology (ART) involves the use of medical techniques to tackle infertility. ART includes the usage of procedures such as ICSI (intracytoplasmic sperm injection), IVF (in vitro fertilization), cryopreservation of embryos or gametes, use of fertility medication, and so on. This book aims to highlight the most recent advances in assisted conception and highlights ongoing and potential future of this field. This book consists of 42 chapters which include individualized controlled ovarian stimulation, luteal phase stimulation, role of adjuvants in controlled ovarian hyperstimulation, endometrial receptivity procedure in assisted reproductive technology, genetic testing in male infertility, medical management of male infertility, color Doppler in infertility, fertility enhancing surgeries in ART, recurrent pregnancy loss, regenerative medicine in infertility, oocyte quality, morphokinetics in ART, co-culture techniques in ART, triple parenting, etc. The book is a comprehensive learning manual providing important information for both scientists and clinicians. Every chapter is focused on a specific topic and uses international scientific standards of evidence-based medicine. **Women as Wombs** Janice G. Raymond, 1995. Annotation: Renowned scholar and feminist activist Janice Raymond delivers a passionate expose and uncovers the alarming ethical, legal, and political implications of high-tech biomedical reproductive technologies. She argues that these technologies are neither liberatory nor an issue of reproductive choice. Rather, they violate the integrity of women's bodies, perpetuate

prostitution and an international trafficking in women and children and are a threat to women's basic human rights Women As Wombs is a scathing feminist analysis which contributes groundbreaking insights to the raging debate over reproductive technology *Infertility, Assisted Reproductive Technologies and Hormone Assays* Dhastagir Sultan Sheriff, 2019-07-17 Infertility is a major public health concern and medical condition that afflicts millions globally As such many people seek reproductive care with the goal of receiving a proper diagnosis and a successful outcome using assisted reproductive technology ART Infertility Assisted Methods of Reproduction and Hormonal Assays provides an overview of ART methods and discusses recent trends in the field Chapters cover an array of topics including diagnosis of infertility using hormonal assays adverse outcomes of ART oocyte donation cryopreservation of oocytes and embryos and psychosocial care *Textbook of Assisted Reproductive Technologies* David. K Gardner, Ariel Weissman, Colin M. Howles, Zeev Shoham, 2008-11-11 Textbook of Assisted Reproductive Technologies is a truly comprehensive manual for the whole team at the IVF clinic Information is presented in a highly visual manner allowing both methods and protocols to be consulted easily The text provides clinical and scientific teams with the A to Zs of setting up an embryology laboratory gives research fellows insight into technical developments and supplies seasoned professionals with a review of the latest techniques and advances New to the Third Edition fully revised and expanded chapters with new information on single embryo transfer artificial gametes pharmacogenetics **Atlas of Assisted Reproductive Technologies** Surveen Ghumman, 2023-06-26 This atlas provides details of the procedures of assisted reproductive techniques The science of in vitro fertilization has made considerable advances and many general gynecologists are now specializing to become infertility experts It covers embryology and clinical aspects with pictures This atlas serves as a quick reference as most of the lab work requires pictures of oocytes embryos and sperms to understand the various stages of the process It is a comprehensive updated practical guide on procedures in in vitro fertilization helpful for general gynecologists and infertility experts **Reproductive Technologies in Farm Animals** Ian Gordon, 2004 In the past half century great progress has been made in the reproductive management of farm animals both mammals and birds This book aims to review developments and indicate which reproductive technologies can be used commercially or in research It begins by discussing artificial insemination and how this has recently been refined in semen sexing technology Embryo transfer in vitro embryo production technology and the control of oestrus and ovulation are then reviewed Subsequent chapters consider the control of postpartum ovarian activity seasonal breeding multiple births and litter size pregnancy testing parturition and the onset of puberty The author then describes more recent developments in cloning and the production of transgenic animals before a final chapter on suppressing reproductive activity **Assisted Reproductive Technology** Christopher J. De Jonge, Christopher L. R. Barratt, 2002-07-11 This text describes the rapid advances that have revolutionized reproductive medicine due to the result of converging and overlapping developments in reproductive biology molecular biology and genetics **Living Laboratories** Robyn Rowland, 1992 **Reconfiguring**

**Reproduction** Sarojini N., Vrinda Marwah, 2015-01-01 Though commonplace today as a technological quick fix for infertility assisted reproduction is a complex phenomenon located at the intersection of patriarchy medicalization and commerce These technologies create both challenges and opportunities and response to them have sought to balance questions of ethics rights and politics The essays in this volume map the journey of ARTs in different countries examining the global industry and the challenges it poses in the context of markets and look at regulatory frameworks in diverse settings Together they bring a feminist lens to the examination of the now established ART industry Sama s longstanding work provides a special focus on India the spread and features of the industry the gendered nature of the burden and treatment of infertility the destabilization of the family as we know it and feminist debates around surrogacy that re assess ideas of agency and commodification Published by Zubaan
