Booklist ,1943-09      Magnetic Resonance of Myelin, Myelination and Myelin Disorders Marjo S. van der Knaap, Jacob Valk, 2013-06-29 The first edition of this book was well received by readers and reviewers and we are very grateful for the positive reactions We were convinced then and even more now that MRI and MRS have much to offer in diagnosis therapy monitoring and research of hereditary and acquired myelin disorders In the last few years a great deal of new information has come available concerning the genetic basis of inborn errors of metabolism and neurodegenerative disorders the role of subcellular structures the enzyme biochemistry the pathophysiological mechanisms of posthypoxic ischemic cerebral damage and the inflammatory processes in infectious and inflammatory disorders MR images of many rare disorders have become available either in our own experience or published by other groups MR spectroscopy could confirm its role in certain clinical applications Because of these developments it was necessary for us to rewrite the book almost completely In some fields developments are so fast that we may not have caught all the latest developments The pattern of the new approaches has however been established making the assimilation of newly available information easy We are extremely grateful for the help of colleagues to make this book as complete as possible The positive reactions of those from whom we requested MR pictures or other forms of support were of enormous encouragement to us

during our efforts to complete this project We hope this work will be as warmly welcomed by our colleagues as the first edition
