Potato Production And Consumption In Developing Countries:

Potato Production and Consumption in Developing Countries Winston B. Charles, Food and Agriculture Organization of the United Nations, 1991-01-01 Production potentials in developing countries Present restraints to improving productivity Research and development

Potatoes Douglas Horton, 2019-06-25 Although the potato is usually thought of as a temperate zone crop potato growing in the tropics and subtropics is spreading rapidly In terms of the dollar value of the crop this edible root now ranks fourth in the developing world after rice wheat and maize Nevertheless policymakers often underrate the importance of the potato as a source of employment income and food or they underestimate the potential benefits from expanding potato production and use The payoff from applied research on potato cultivation in the tropics and subtropics is high due to the large body of scientific information from developed countries This book summarizes the principles of potato production distribution and use The essential facts about the potato as a crop a commodity and a food are discussed as well as the issues that scientists and policymakers should consider in setting priorities for implementing and assessing the impact of potato research and extension programs A major premise of the book is that programs aiming to increase food supplies and reduce poverty through crop improvement need to consider not only production technology but also marketing strategies and consumption patterns Adequate planning for agricultural research and development requires an understanding of how crops are grown marketed and used and of what potential benefits the new technologies can yield Hence effective crop improvement programs need both technical and socioeconomic expertise The administrators and others responsible for implementing these programs must concern themselves with the policies that impinge on the adoption and consequences of new production methods so that their countries may reap the full benefits of an increased and stable food supply

Potato production and innovative technologies Anton J. Haverkort, Boris V. Anisimov, 2023-08-28 This comprehensive book is the result of the Potato Russia international conference that took place in August 2007 in Moscow It begins with a series of papers that give an excellent overview of consumer behaviour and marketing with examples from various countries in the world The quality of processing and ware potato and methods of quantifying it is addressed by papers that highlight its need and reveal new approaches and techniques The newest developments in technology mechanization and storage are highlighted in papers from eastern and western Europe The importance and benefits of having adequately functioning seed potato systems with up to date rapid multiplication systems is shown in chapters from various countries with a special contribution on the commercial quality standards of the United Nations Economic Commission for Europe UNECE Developments of recent agronomic and crop management practices are illustrated with examples of countries in technological and market transition Innovations in crop protection put special emphasis on diagnostics and detection of resistance levels among others against wart The extensive Russian breeding programmes with value for the global potato community are highlighted in the breeding section with additional papers from Japan and the

Netherlands The book ends with a series of papers on molecular aspects of innovative breeding This book is of wide and ongoing interest to stakeholders around the world who are interested in all aspects of the rapidly evolving potato supply chains such as potato producers breeding chemical and machinery companies and potato specialists of all disciplines

Potato Production Worldwide Mehmet Emin Caliskan,Allah Bakhsh,Khawar Jabran,2022-10-22 Potato is a crop grown on all inhabited continents of the globe It is included in the top five crops of the world used as staple food in several countries and the number of people daily consuming the potato may surpass one billion Despite the high quantities of seed potato produced worldwide there are yield gaps due to challenges such as abiotic stresses pests climate change and poor production practices A region wide critical analysis of yield declining factors can help formulate management strategies that can improve potato yields Bridging yield gaps in potato will ultimately ensure the role of this crop in securing current and future food security Potato Production Worldwide presents information on this global crop from its history morphology and taxonomy to the growth and development of the potato crop including the latest strategies in addressing today s biotic and abiotic challenges This book identifies the reasons for yield gaps in various potato production regions of the world as well as presenting the best production practices pest management strategies and approaches to deal with climate change from the perspective of potato production Chapters provide important insights into potato production cultures and approaches in the major potato production countries Potato Production Worldwide will be a valuable resource for researchers scientists and students seeking a comprehensive view of successful potato production Provides comprehensive information on the origin history taxonomy morphology ecophysiology growth and development of the potato Addresses production practices including irrigation nutrient management harvesting and post harvest techniques Explores the impact of Abiotic stresses drought chilling salinity etc and their management *Potatoes for the Developing World* International Potato Center,1984 The first 12 years Potatoes in the developing world The International Potato Center Collaborative research and development strategies Research program and results Illustrative studies A.I.D.
