**Today** ,2006 Higher Education at Risk Sandra Featherman,2023-07-03 Sandra Featherman believes that colleges are in  
 denial about the severity of the threats to the current model of higher education Based on her own experience as a president  
 as a trustee and as a board member who has worked in private and public universities and on interviews with the presidents  
 of major institutions she offers both a trenchant analysis of those threats and clear prescriptions about the painful but  
 necessary decisions that colleges need to make to ensure they remain viable accessible and affordable and deliver a high  
 quality education Sandra Featherman considers higher education to be at a game changing moment When markets don t  
 function well as is the case with today s college marketplace with offerings that cost too much and return too little it opens  
 the door to new types of suppliers who offer new ways of providing what students are looking for particularly the increasing  
 cohort of mature working students In the face of new competitors for profit education companies technology start ups and  
 foreign universities vying for international students trustees and senior level administrators are generally stuck in a  
 traditional ethos and with decision making processes unsuited to these times They know what used to work and find it easier  
 to follow old ways than to make the difficult transition to new ways of delivering education She lays out a strategy that  
 emphasizes the centrality of students and how to provide them with the most effective learning environment that is clear  
 eyed about focusing on the core missions and abandoning practices that constrain or impede them and that requires constant  
 self monitoring to learn from and act upon what works She offers a blueprint for redesigning institutions for paring away  
 what is unnecessary and cost ineffective and for adopting the best technologies all in the service of developing meaningful  
 degree programs at an affordable price and widening access for under represented groups She ranges over the implications  
 of budget decisions accreditation and MOOCs addresses government regulation and tuition costs presents promising new  
 models and concludes with 11 key recommendations that should be heeded by all higher education administrators and
