Soft Computing Applications Valentina Emilia Balas, Lakhmi C. Jain, Branko Kovačević, 2015-11-02 These volumes constitute the Proceedings of the 6th International Workshop on Soft Computing Applications or SOFA 2014 held on 24-26 July 2014 in Timisoara, Romania. This edition was organized by the University of Belgrade, Serbia, in conjunction with the Romanian Society of Control Engineering and Technical Informatics (SRAIT) Arad Section, The General Association of Engineers in Romania Arad Section, Institute of Computer Science Iasi Branch of the Romanian Academy, and IEEE Romanian Section. The Soft Computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability, robustness, and low solution cost. Soft computing facilitates the use of fuzzy logic, neurocomputing, evolutionary computing, and probabilistic computing in combination, leading to the concept of hybrid intelligent systems. The combination of such intelligent systems, tools, and a large number of applications introduces a need for a synergy of scientific and technological disciplines in order to show the great potential of Soft Computing in all domains. The conference papers included in these proceedings, published post-conference, were grouped into the following areas of research: Image, Text, and Signal Processing; Intelligent Transportation Modeling and Applications; Biomedical Applications; Neural Network and Applications; Knowledge-Based Technologies for Web Applications; Cloud Computing; Security Algorithms and Computer Networks; Knowledge-Based Technologies; Soft Computing Techniques for Time Series Analysis; Soft Computing and Fuzzy Logic in Biometrics; Fuzzy Applications; Theory and Fuzzy Control; Business Process Management Methods and Applications in Electrical Engineering. The volumes provide useful information to professors, researchers, and graduated students in the area of soft computing techniques and applications as they report new research work on challenging issues.

Consumer Psychology in a Social Media World Claudiu V. Dimofte, Curtis P. Haugtvedt, Richard F. Yalch, 2015-09-16 Consumer Psychology in a Social Media World seeks to illustrate the relevance of consumer psychology theory and research to understanding the social media world that has rapidly become a key component in the social and economic lives of most individuals. Despite the rapid and widespread adoption of social media by consumers, research focused on individuals' use thereof and its implications for organizations and society has been limited and published in scattered outlets. This has made it difficult for those trying to get either a quick introduction or an in-depth understanding of the associated issues to locate relevant scientific-based information. The book is organized into five broad sections. The first presents a summary overview of social media, including a historical and cultural perspective. The second section is focused on social media as a modern form of word of mouth, always considered the most impactful on consumers. It also touches upon a motivational explanation for why social media has such a strong and broad appeal. Section three addresses the impact that consumers' switch to social media as a preferred channel has had on marketers' branding and promotional efforts, as well as the ways in which consumer

involvement can be maintained through this process Section four takes a methodological perspective on the topic of social media assessing ways in which big data and consumer research are influenced by novel ways of gathering consumer feedback and gauging consumer sentiment Finally section five looks at some consumer welfare and public policy implications including privacy and disadvantaged consumer concerns Consumer Psychology in a Social Media World will appeal to those who are involved in creating managing and evaluating products used in social media communications As seen in recent financial and business market successes e g Facebook Twitter LinkedIn Instagram Pinterest WhatsApp etc businesses focused on facilitating social media are part of the fastest growing and most valuable sector of today s economy Das Zeitalter des Überwachungskapitalismus Shoshana Zuboff,2018-10-04 Gegen den Big Other Kapitalismus ist Big Brother harmlos Die Menschheit steht am Scheideweg sagt die Harvard konomin Shoshana Zuboff Bekommt die Politik die wachsende Macht der High Tech Giganten in den Griff Oder berlassen wir uns der verborgenen Logik des Überwachungskapitalismus Wie reagieren wir auf die neuen Methoden der Verhaltensauswertung und manipulation die unsere Autonomie bedrohen Akzeptieren wir die neuen Formen sozialer Ungleichheit Ist Widerstand ohnehin zwecklos Zuboff bewertet die soziale politische konomische und technologische Bedeutung der gro en Ver nderung die wir erleben Sie zeichnet ein unmissverst ndliches Bild der neuen M rkte auf denen Menschen nur noch Quelle eines kostenlosen Rohstoffs sind Lieferanten von Verhaltensdaten Noch haben wir es in der Hand wie das n chste Kapitel des Kapitalismus aussehen wird Meistern wir das Digitale oder sind wir seine Sklaven Es ist unsere Entscheidung Zuboffs Buch liefert eine neue Erz hlung des Kapitalismus An ihrer Deutung kommen kritische Geister nicht vorbei Location is (still) Everything David Richard Bell,2014 How the physical world around us influences what we buy and consume online by Wharton professor and consumer shopping behavior expert David R Bell A book for current and future entrepreneurs business and economics students professional investors and anyone else with a stake or interest in how use of the Internet is likely to evolve *Handbook of Real-Time Computing* Yu-Chu Tian,David Charles Levy,2022-08-08 The aim of this handbook is to summarize the recent rapidly developed real time computing technologies from theories to applications This handbook benefits the readers as a full and quick technical reference with a high level historic review of technology detailed technical descriptions and the latest practical applications In general the handbook is divided into three main parts subjected to be modified theory design and application covering different but not limited to the following topics Real time operating systems Real time scheduling Timing analysis Programming languages and run time systems Middleware systems Design and analysis tools Real time aspects of wireless sensor networks Energy aware real time methods **Bottom Line's Smart Consumer** ,2003 *Parents* ,2002 Popular Science ,2002 **Scalable Near Zero Energy Retrofits in Low-income Multifamily Housing** Ram Narayanamurthy,Peng Zhao,Electric Power Research Institute,2019 **DDC Learning Computer Concepts** Shelley O'Hara,2001 For courses in Computer Concepts Focusing throughout is on essential information clearly explained and rooted
