Making the Majors Eric M. Leifer, 1995 In this in-depth look at major league sports, Eric Leifer traces the growth and development of major leagues in baseball, football, basketball, and hockey, and predicts fundamental changes as the majors pursue international expansion. He shows how every past expansion of sports publics has been accompanied by significant changes in the way sporting competition is organized. With each reorganization, the majors have created teams closer in ability, bringing repetition to competition across time only to expand and energize the public's search for differences between teams and for events that disrupt the repetitive flow. The phenomenal success of league sports, Leifer writes, rests on their ability to manufacture inequalities for fans to latch on to without jeopardizing the equalities that draw fans in. Leifer supports his theory with historical detail and statistical analysis. He examines the special concerns of league organizers in pursuing competitive balance and presents a detailed analysis of how large city domination has been undermined in the modern era of Major League Baseball. Using games from the four major league sports, he then shows how fans can themselves affect the course of competition. In NFL football, for example, fans account for nearly all of the persisting inequality in team performance. The possibility of sustaining inequality among equals

emerges from the cross pressures that fans and leagues place on competition With substantial data in hand Leifer asks the essential question facing the leagues today how can they sustain a situation that depends entirely on simultaneous equality and contention one in which fan involvement may evaporate as soon as one team dominates His answer has significant implications for the future of major league sports both nationally and internationally **Mediaweek** ,2007 **Pro Football Guide** Sporting News,2005-06 This annual guide is a comprehensive compilation of information and statistics for the upcoming National Football League season It reviews last year s season spotlights draft picks and provides complete team league and draft records dating back to 1920 *Proceedings American Association for Artificial Intelligence*,2004 Proceedings from the latest meeting of the leading AI conference includes theoretical experimental and empirical work The National Conference on Artificial Intelligence remains the bellwether for research in artificial intelligence Leading AI researchers and practitioners as well as scientists and engineers in related fields present theoretical experimental and empirical results covering a broad range of topics that include principles of cognition perception and action the design application and evaluation of AI algorithms and systems architectures and frameworks for classes of AI systems and analyses of tasks and domains in which intelligent systems perform The Innovative Applications of Artificial Intelligence conference highlights successful applications of AI technology explores issues methods and lessons learned in the development and deployment of AI applications and promotes an interchange of ideas between basic and applied AI This volume presents the proceedings of the latest conferences held in July 2004 **Pro Football Guide 2006** Sporting News,2006-07 Published annually by the Sporting News as part of its statistical reference library the Pro Football Guide 2006 is a comprehensive compilation of information and statistics for the upcoming 2006 National Football League season Its unique combination of material makes it a book that NFL fans will want to access in the weeks leading up to the regular season and throughout the season FEATURES Week by week 2005 season in review Key off season transactions and draft picks Super Bowl and complete Postseason review 2006 Training Camp rosters 2005 week by week schedules Historical information including past award winners plus complete team and league and draft records dating back to 1920 A must for Fantasy League players and armchair quarterbacks **Britannica Book of the Year** Franklin Henry Hooper, Walter Yust, 1966 *Cable Vision* ,1987 *The Official National Football League Record and Fact Book*, 1993 National Football League, 1993-07 The only record book authorized by the NFL and distributed to media around the world to assist in their coverage of the NFL Includes game by game summaries of the 1992 season 1992 team and individual stats top passing rushing receiving and quarterback sack performances 1993 NFL draft summary and more **Broadcasting** ,1982-10 **Beckett Football Card Price Guide** Beckett Publications, James Beckett, 2000-08 The new edition of this popular annual guide features more than 4 000 football card sets checklisted and priced Virtually every football card ever produced Prices and listings cover the years from 1894 to present Includes cards from NFL CFL USFL colleges
