Gordon,Jeffrey K. MacKie-Mason,1994 Several recent papers argue that corporate income taxes should not be used by small open economies With capital mobility the burden of the tax falls on fixed factors e g labor and the tax system is more efficient if labor is taxed directly However corporate taxes not only exist but rates are roughly comparable with the top personal tax rates Past models also forecast that multinationals should not invest in countries with low corporate tax rates since the surtax they owe when profits are repatriated puts them at a competitive disadvantage Yet such foreign direct investment is substantial We suggest that the resolution of these puzzles may be found in the role of income shifting both domestic between the personal and corporate tax bases and cross border through transfer pricing Countries need cash flow corporate taxes as a backstop to labor taxes to discourage individuals from converting their labor income into otherwise untaxed corporate income We explore how these taxes can best be modified to deal as well with cross border shifting     Real Estate Record and Builders' Guide ,1894
