Ultimate Java Functional Projects: Build, Architect, and Deploy Enterprise Java Applications with Spring Boot, Microservices, and Kubernetes Bhargav Bachina, 2025-11-28 Unlock the Power of Java From Fundamentals to Microservices Deployment Key Features Master Java fundamentals OOP concepts and build real world projects Develop and secure scalable microservices using Spring Boot and Docker Deploy monitor and scale Java applications on AWS Azure and Kubernetes Book Description Java remains the premier choice for building robust scalable functional applications in enterprise environments This book *Ultimate Java Functional Projects* bridges the gap between theory and real world application equipping developers with the coding proficiency architectural thinking and deployment expertise essential for modern software engineering roles It takes readers from core Java fundamentals through enterprise grade microservices development offering a strategic blend of theory hands on projects and industry aligned implementation Beginning with Java essentials syntax OOP principles concurrency and database integration the book progressively advances into microservices architecture API communication centralized configuration and fault tolerance Each concept is immediately reinforced through practical projects including a Weather App and Chat Application built with Spring Boot enabling readers to apply learning directly to real world scenarios The journey culminates with containerization using Docker orchestration with Kubernetes and deployment across leading cloud platforms AWS Azure GCP Hence by the end of the book developers will master the complete application lifecycle from architecture and development to securing deploying and maintaining resilient cloud native Java solutions that meet today's enterprise standards What you will learn Master Java syntax OOP principles advanced libraries and language features Build RESTful services and integrate databases using Spring Boot Design and deploy microservices with service discovery and APIs Implement encryption authentication and fault tolerance mechanisms Containerize Java apps with Docker and orchestrate them on Kubernetes Deploy and scale microservices across AWS Azure and GCP platforms

Building Applications with AI Agents Michael Albada, 2025-09-16 Generative AI has revolutionized how organizations tackle problems accelerating the journey from concept to prototype to solution As the models become increasingly capable we have witnessed a new design pattern emerge AI agents By combining tools knowledge memory and learning with advanced foundation models we can now sequence multiple model inferences together to solve ambiguous and difficult problems From coding agents to research

agents to analyst agents and more we've already seen agents accelerate teams and organizations While these agents enhance efficiency they often require extensive planning drafting and revising to complete complex tasks and deploying them remains a challenge for many organizations especially as technology and research rapidly develops This book is your indispensable guide through this intricate and fast moving landscape Author Michael Albada provides a practical and research based approach to designing and implementing single and multiagent systems It simplifies the complexities and equips you with the tools to move from concept to solution efficiently Understand the distinct features of foundation model enabled AI agents Discover the core components and design principles of AI agents Explore design trade offs and implement effective multiagent systems Design and deploy tailored AI solutions enhancing efficiency and innovation in your field

Building Data-Driven Applications with LlamaIndex Andrei Gheorghiu, 2024-05-10 Solve real world problems easily with artificial intelligence AI using the LlamaIndex data framework to enhance your LLM based Python applications Key Features Examine text chunking effects on RAG workflows and understand security in RAG app development Discover chatbots and agents and learn how to build complex conversation engines Build as you learn by applying the knowledge you gain to a hands on project

Book Description Discover the immense potential of Generative AI and Large Language Models LLMs with this comprehensive guide Learn to overcome LLM limitations such as contextual memory constraints prompt size issues real time data gaps and occasional hallucinations Follow practical examples to personalize and launch your LlamaIndex projects mastering skills in ingesting indexing querying and connecting dynamic knowledge bases From fundamental LLM concepts to LlamaIndex deployment and customization this book provides a holistic grasp of LlamaIndex's capabilities and applications By the end you'll be able to resolve LLM challenges and build interactive AI driven applications using best practices in prompt engineering and troubleshooting Generative AI projects What you will learn Understand the LlamaIndex ecosystem and common use cases Master techniques to ingest and parse data from various sources into LlamaIndex Discover how to create optimized indexes tailored to your use cases Understand how to query LlamaIndex effectively and interpret responses Build an end to end interactive web application with LlamaIndex Python and Streamlit Customize a LlamaIndex configuration based on your project needs Predict costs and deal with potential privacy issues Deploy LlamaIndex applications that others can use Who this book is for This book is for Python developers with basic knowledge of natural language processing NLP and LLMs looking to build interactive LLM applications Experienced developers and conversational AI developers will also benefit from the advanced techniques covered in the book to fully unleash the capabilities of the framework

Generative AI Apps with LangChain and Python Rabi Jay, 2024-12-26 Future proof your programming career through practical projects designed to grasp the intricacies of LangChain's components from core chains to advanced conversational agents This hands on book provides Python developers with the necessary skills to develop real world Large Language Model LLM based Generative AI applications quickly regardless of their experience level Projects throughout the book offer practical

LLM solutions for common business issues such as information overload internal knowledge access and enhanced customer communication Meanwhile you ll learn how to optimize workflows enhance embedding efficiency select between vector stores and other optimizations relevant to experienced AI users The emphasis on real world applications and practical examples will enable you to customize your own projects to address pain points across various industries Developing LangChain based Generative AI LLM Apps with Python employs a focused toolkit LangChain Pinecone and Streamlit LLM integration to practically showcase how Python developers can leverage existing skills to build Generative AI solutions By addressing tangible challenges you ll learn by be doing enhancing your career possibilities in today s rapidly evolving landscape What You Will Learn Understand different types of LLMs and how to select the right ones for responsible AI Structure effective prompts Master LangChain concepts such as chains models memory and agents Apply embeddings effectively for search content comparison and understanding similarity Setup and integrate Pinecone vector database for indexing structuring data and search Build Q those seeking a structured guide to enhance their careers by learning to create robust real world LLM powered Generative AI applications data scientists analysts and experienced developers new to LLMs

Intelligent Systems and Applications Kohei Arai,2024-07-31 This volume is a collection of meticulously crafted insightful and state of the art papers presented at the Intelligent Systems Conference 2024 held in Amsterdam The Netherlands on 5 6 September 2024 The conference received an overwhelming response with a total of 535 submissions After a rigorous double blind peer review process 181 papers were selected for presentation These papers span a wide range of scientific topics including Artificial Intelligence Computer Vision Robotics Intelligent Systems and more We hope that readers find this volume both interesting and valuable Furthermore we expect that the conference and its proceedings will inspire further research and technological advancements in these critical areas of study Thank you for engaging with this collection of works from the Intelligent Systems Conference 2024 Your interest and support contribute significantly to the ongoing progress and innovation in the field of intelligent systems
