## College Rankings Deal Promo:

**Global University Rankings and the Mediatization of Higher Education** Michelle Stack, 2016-04-12 Higher Education Institutions simultaneously critique and participate in national and international rankings of universities. However, this creates a difficult situation since if universities do participate in rankings, they acquiesce to a system based in media logics that has little to do with academic norms of research. If they do not participate in the rankings, they risk losing public funding, students, and donors in an increasingly competitive and globalized environment. This book delves into the influence of journalists, business tycoons, and multinational corporations in defining what world class is and how it will be measured. Rankings provide us with a rich study for understanding how universities define, deploy, and manage their assets and liabilities in a mediatized, globalized economy.

**Influence of University Rankings on Institutions: Ethics, Controversies, and Competition** Kayyali, Mustafa, 2025-10-16 The influence of university rankings on higher education institutions reveals ethical concerns, controversies, and increased global competition. As rankings become a measure of academic prestige, many universities align their strategies with ranking criteria, sometimes at the expense of educational values. This pursuit of higher rankings often drives institutions to invest in research output and international visibility while potentially neglecting teaching quality or community engagement. Criticisms emerge over the transparency and fairness of ranking methodologies, raising questions about their validity and the consequences they produce. Further exploration into the ethical implications of rankings may reveal new contentious practices and competitive dynamics shaped by the prioritization of university rankings.

**Influence of University Rankings on Institutions: Ethics, Controversies, and Competition** explores how the pursuit of higher university rankings influences institutional priorities, behaviors, and decision-making processes. It examines the ethical dilemmas, methodological controversies, and competitive pressures that arise from global ranking systems. This book covers topics such as mental health, teacher education, and ethics and bias, and is a useful resource for educators, policymakers, government officials, psychologists, academicians, researchers, and scientists.

***Global University Rankings and the Politics of Knowledge*** Michelle Stack, 2021-06-17 For many institutions, to ignore your university's ranking is to become invisible, a risky proposition in a competitive search for funding. But rankings tell us little, if anything, about the education scholarship or engagement with communities offered by a university. Drawing on a range of research and inquiry-based methods, *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact. Conceptually unique in its scope, *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems. Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education. Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media-driven rankings.

This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice *Promotions and examinations in graded schools* Emerson E. White,1891 Global University Rankings T. Erkkilä,2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe **Higher Education Contract Clause Finder** University of Hawaii (Honolulu). Industrial Relations Center,1977
