2017 in the subject Business economics Accounting and Taxes grade 1 3 University of applied sciences Frankfurt a M FOM language English abstract The beginning of the digital revolution at the turn of the millennium has ushered in a structural change in many sectors Due to the increased use of modern information and communication technologies ICT several sectors have already experienced existential economic implications This is especially evident in the music media and publishing industries For example music is not only purchased on CDs from local retail stores but is also increasingly consumed via the Internet through streaming services such as Spotify Videos store rentals compete with the comfortable video on demand services available in customers own homes The Internet as a medium for information and consumption for products and services has established itself as a faster more comfortable and more efficient channel in comparison to traditional sales channels Stationary retail stores were also not spared from digital disruption The market research institute Gesellschaft f r Konsumforschung GfK predicts a doubling of the online share of retail sales from currently to 20% by the year 2025 At the same time new and innovative market participants known as financial technology or FinTech companies are edging into the financial sector and trying to gain market share from established banks through customer friendly products and services Nevertheless the banks do not seem to recognize the seriousness of the situation and therefore are reluctant to adapt to the new situation However experience has shown that ignorance of an industry s digitization has already led to the fall of large and established companies As a well known example in the technology industry Kodak is often referred to in this context The company s reaction to the digital disruption took place too late whereas other companies had already recognized the trend towards digital photography at an earlier stage and prepared corresponding products As a result Kodak plummeted from the top of the photography technology industry Evidence of ongoing digital disruption of the financial services sector has already been provided in the form of a new type of bank the direct bank which was first introduced in the early 1990s FinTech companies seek to take advantage of this success and gain customers and market share by offering innovative solutions for financial products and services
